

Supplementary Table. Competing risk regression

	Hazard ratios (95% CI)	p-value
60-day heart failure rehospitalization		
Poor vs. Moderate	1.17 (0.69-1.99)	0.567
Poor vs. Good	1.59 (0.77-3.30)	0.213
1-year heart failure rehospitalization		
Poor vs. Moderate	0.92 (0.61-1.40)	0.696
Poor vs. Good	1.07 (0.64-1.79)	0.790

**Supplementary Figure.** Change rate of each guideline-directed therapy during follow up.
