**CONTENTS**

<b>1 Unmarried women</b>	<b>2</b>
1.1 Countries and areas . . . . .	2
1.2 Country aggregates . . . . .	188
<b>2 Married women</b>	<b>221</b>
2.1 Countries and areas . . . . .	221
2.2 Country aggregates . . . . .	407
<b>3 All women</b>	<b>440</b>
3.1 Countries and areas . . . . .	440
3.2 Country aggregates . . . . .	626

These figures contain a systematic and comprehensive set of annual, model-based estimates and projections, and underlying survey-based observations, for a collection of family planning indicators, including contraceptive prevalence, the unmet need for family planning, and the demand for family planning satisfied by use of contraception (any method or modern methods alone).

The results pertain to unmarried and not in a union women of reproductive age (UWRA), married or in a union women of reproductive age (MWRA) and women of reproductive age irrespective of marital status (WRA) and cover the period from 1970 to 2030. Estimates based on medians, as well as 80 per cent uncertainty intervals (represented by lines) and 95 per cent uncertainty intervals (represented by shaded areas), are provided for 185 countries or areas. The results are based on data available as of February 2019.

*Note:* The designations employed and the material presented in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. The term “country” as used in this publication also refers, as appropriate, to territories or areas. Countries or areas listed individually are only those with 90,000 inhabitants or more in 2017; the rest are included in the aggregates but are not listed separately.

## 1 Unmarried and not in a union women of reproductive age

### 1.1 Countries and areas

Afghanistan (Southern Asia, SA Group 0) --- Unmarried / Not In-Union
