

SURVEY

The purpose of this survey is to explore the significant competencies (knowledge, skills, attitudes and behaviors) that need to be built and developed as a prerequisite for a high level of caregiver performance in a domestic environment.

Thanks in advance for all your effort!

Give your digital assessment of the weight of the relevant competence according to the scale:

1 - does not do it

2 - sometimes, but rarely does

3 - in half the cases does in the other half does not

4 - more often does

5 - always does it

Basic labor tasks	Degree of significance (1 to 5 points)				
	does not do it	sometimes, but rarely does	in half the cases does in the other half does not do it	more often does	always does it
	1	2	3	4	5
