

Supplementary Figure 5. Octreotide and JQ1 combination treatment of AtT20 cells. AtT20 cells were treated with increasing doses of Octreotide for 96h and a combination of 1000nM Octreotide with 1 μ M JQ1. Data is represented relative to untreated (UT) cells. DMSO, JQ1- and H2O were all used as negative controls. *** p <0.0005.
