

Fig. S1

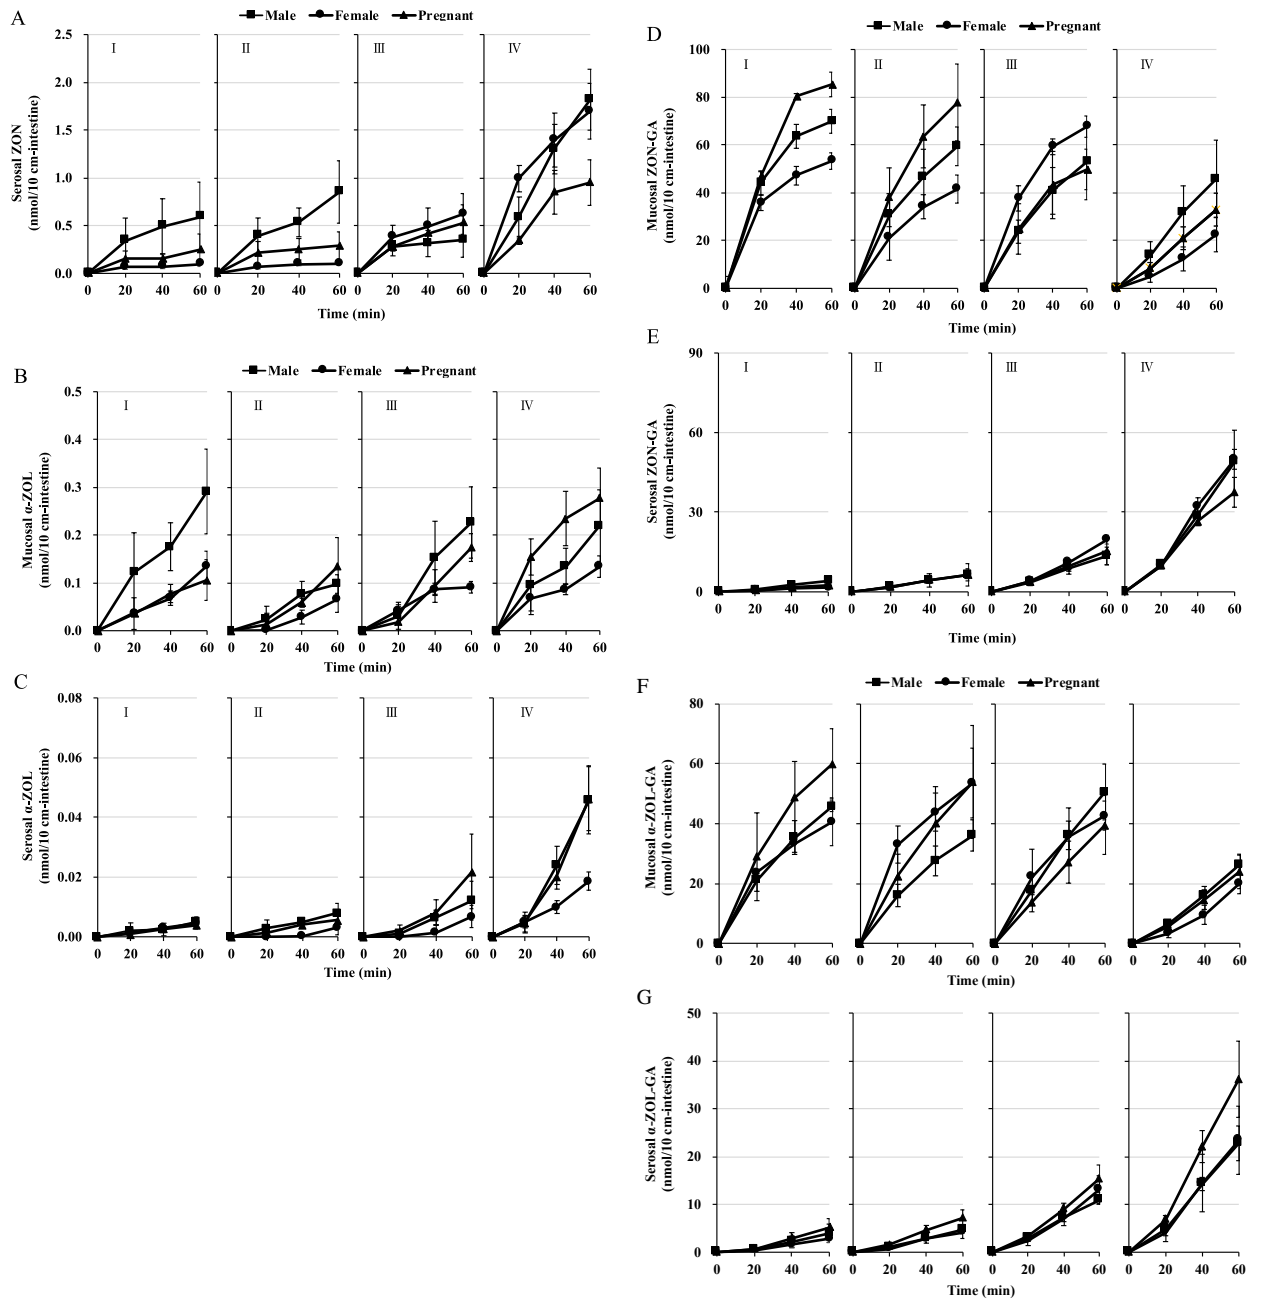

Figure S1. Transition of zearalenone and its metabolites every 20 min in rat everted intestine

The resulting zearalenone (ZON) (A) and its metabolites (α -zearalenol [B] and [C]; zearalenone glucuronide [D] and [E]; α -zearalenol glucuronide [F] and [G]) excreted to the mucosal side (A, C, E, and G) and transported to the serosal side (B, D, and F).
