

**Additional file 6****Table S5.** Clinical Information of 8 Patients with Pericardial Effusion  $\geq$  Grade 3

<b>Patient</b>	<b>Symptoms</b>	<b>Electrocardiography</b>	<b>Echocardiography</b>	<b>Pleural effusion</b>	<b>Treatment</b>
1	Dyspnea	Sinus rhythm, low voltage QRS complexes	Large pericardial effusion with RA and RV collapse	Bilateral	Pericardial window
2	Dyspnea	Not available	Thickened pericardium and pericardial effusion with RA collapse	Bilateral	Conservative management
3	Dyspnea	Sinus rhythm, low voltage in frontal leads	Pericardial effusion	Bilateral	Conservative management
4	Dyspnea, orthopnea	Sinus tachycardia, low voltage in frontal leads	Large pericardial effusion with RV collapse	Bilateral	Pericardiocentesis
5	Dyspnea, lower limbs edema	Atrial fibrillation, low voltage in frontal leads	Large pericardial effusion with RA and RV collapse	Left	Pericardiocentesis
6	Dyspnea, palpitation	Atrial fibrillation	Large pericardial effusion with RV collapse	No	Pericardial window
7	Dyspnea, chest pain	Sinus rhythm, low voltage in frontal leads	Large pericardial effusion with RV collapse	No	Pericardial window
8	Dyspnea	Sinus tachycardia	Large pericardial effusion	No	Conservative management

Abbreviations: *RA* right atrium, *RV* right ventricle
