

Supplementary Figure 3. IL-10 deficiency leads to impaired phagocytosis of neutrophils in response to *A. baumannii*. (A, B) Thioglycollate-elicited neutrophils (Nphs) from WT and IL-10-deficient mice were infected with *A. baumannii* at 1/10 MOI followed by gentamicin treatment 60 min after infection to remove extracellular bacteria. Live bacteria were then counted by plating onto LB agar supplemented with ampicillin (50 µg/ml) at 1 h (for phagocytosis) or 6 h (for bacterial killing) after infection with *A. baumannii*. Results are expressed as means ± SD. *** $P < 0.001$.
