

Supplementary Figure S7 SMR locus plot of the *CDC42/LINC00339* locus. In the top plot, grey dots represent P-values for SNPs reported in *Sapkota et al.'s* (2017) GWAS meta-analysis for endometriosis and diamonds represent the P-values for probes from the multi-SNP-based SMR test. Crosses in the middle and bottom plots represent the eQTL P-values of SNPs associated with expression of *LINC00339* and *CDC42* in blood respectively. Positions are in hg19.
