

**Supplementary Figure S8** SMR locus plots for *NBR2* and *CPNE1*. The grey dots represent P-values for SNPs reported in the Day et al. GWAS meta-analysis for menopause and diamonds represent the P-values for probes from the SMR test. Crosses represent the eQTL P-values of SNPs associated with expression of *NBR2* (a) and *CPNE1* (b) in endometrium. Positions are in hg38.
