

Supplementary Table 1. Characteristics of all samples used in this study.

Supplementary Figure 1. The reproducibility of the ELISA tests for detection of TRIM33-IgA and CTAG1A-IgG. A. Repeatability in the same batch. B. batch-to-batch reproducibility. The results shown represent the mean and standard deviation of 10 experiments. C. Scatter plot of the repeat TRIM33-IgA signals across batches. D. Scatter plot of the repeat CTAG1A-IgG signals across batches.
