**eTable 1.** Baseline Characteristics of the Population With and Without a Prescription Fill in the Symphony Health Database

	<b>Pharmacy-linked study population (n = 8,373)</b>	<b>No pharmacy linkage (n = 1,729)</b>
<b>Demographics</b>		
Median Age	62 (54, 70)	62 (54, 70)
Male sex	5,664 (67.7)	1,211 (70.0)
Non-white race	990 (11.8)	201 (11.6)
<b>Medical History</b>		
Prior MI	1,713 (20.5)	347 (20.1)
Diabetes	2,734 (32.7)	551 (31.9)
Hypertension	5,763 (68.8)	1,215 (70.3)
Previously missed medication		
Never	4,228 (50.5)	892 (51.6)
1-3 times per month	3,032 (36.2)	609 (35.2)
Once per week or more	824 (9.8)	164 (9.5)
<b>Index hospitalization</b>		
STEMI	3,847 (46.0)	791 (45.7)
PCI performed	7,467 (89.2)	1,536 (88.8)

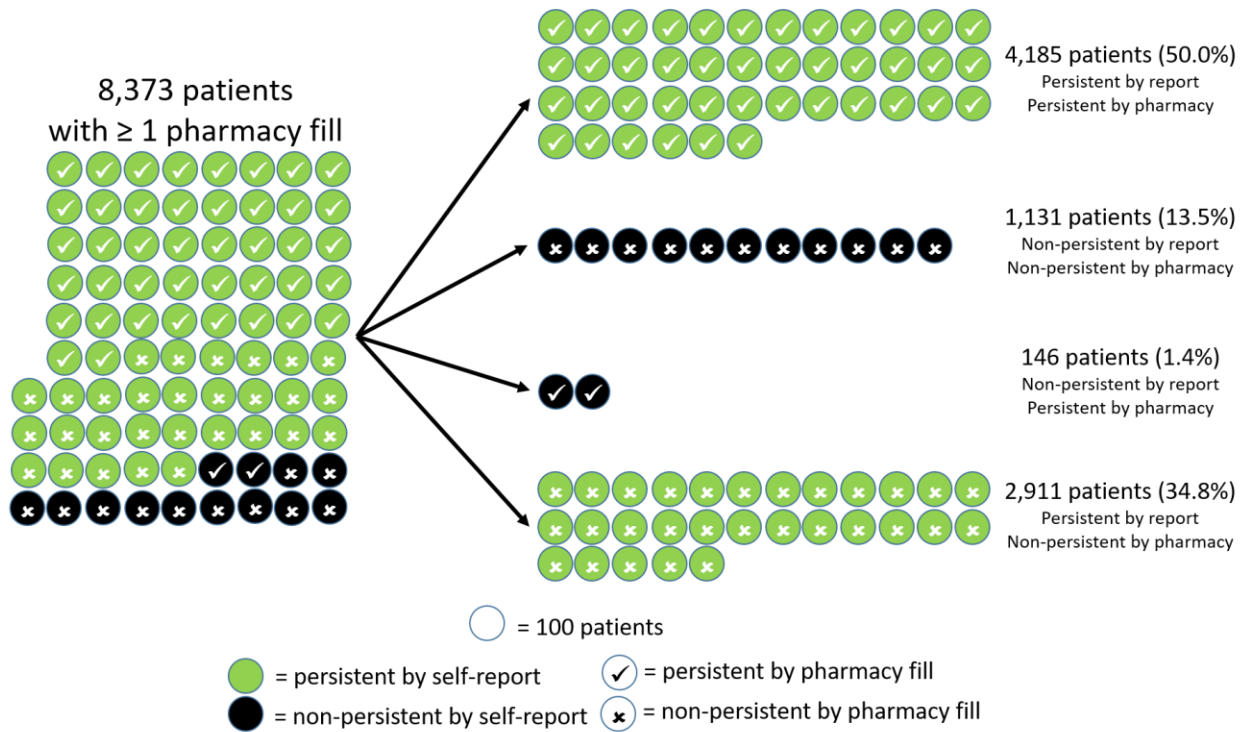

**eTable 2.** Baseline Patient Characteristics

	<b>Measurement Cohorts</b>			
	<b>Overall (n = 10,102)</b>	<b>Pharmacy-linked (n = 8,373)</b>	<b>Voucher Use (n=3,705)</b>	<b>Phlebotomy (n = 944)</b>
<b>Demographics</b>				
Median Age	62 (54, 70)	62 (54, 70)	61 (53, 69)	64 (55, 71)
Male sex	6,875 (68.1)	5,664 (67.7)	2604 (70.3)	646 (68.4)
Non-white race	1,191 (11.8)	990 (11.8)	325 (8.8)	79 (8.4)
<b>Medical History</b>				
Prior MI	2,060 (20.4)	1713 (20.5)	663 (17.9)	195 (20.7)
Prior PCI	2,562 (25.4)	2,123 (25.4)	811 (21.9)	244 (25.9)
Prior CABG	1,128 (11.2)	925 (11.1)	335 (9.0)	120 (12.7)
Prior stroke or TIA	680 (6.7)	550 (6.6)	183 (4.9)	45 (4.8)
Peripheral arterial disease	634 (6.3)	519 (6.2)	167 (4.5)	66 (7.0)
Prior HF	784 (7.8)	649 (7.8)	200 (5.4)	66 (7.0)
Diabetes	3,285 (32.5)	2,734 (32.7)	1073 (29.0)	312 (33.1)
Hypertension	6,978 (69.1)	5,763 (68.8)	2398 (64.7)	671 (71.1)
Depression	1,166 (11.5)	961 (11.5)	391 (10.6)	116 (12.3)
Previously missed medication				
Never	5,120 (50.7)	4,228 (50.5)	1955 (52.8)	467 (49.5)
1-3 times per month	3,641 (36.0)	3,032 (36.2)	1278 (34.5)	358 (37.9)
Once per week or more	988 (9.8)	824 (9.8)	310 (8.4)	88 (9.3)
<b>Index hospitalization</b>				
STEMI	4,638 (45.9)	3,847 (46.0)	1779 (48.0)	457 (48.4)
Multivessel CAD	4,687 (46.4)	3,868 (46.2)	1718 (46.4)	414 (43.9)
PCI performed	9,003 (89.1)	7,467 (89.2)	3430 (92.6)	855 (90.6)
CABG	154 (1.5)	125 (1.5)	40 (1.1)	17 (1.8)
Median Length of stay	2 (2, 3)	2 (2, 3)	2 (2, 3)	2 (2, 3)

**eTable 3.** Twelve-Month Kaplan-Meier Event Rates by Patient Reported and Pharmacy Fill Persistence

	<b>Concordantly persistent (n = 4185)</b>		<b>Concordantly non-persistent (n = 1131)</b>		<b>Discordant: Patient report persistent, pharmacy fill non-persistent (n = 2911)</b>		<b>Discordant: Patient report non- persistent, pharmacy fill persistent (n = 146)</b>	
	<b>N events</b>	<b>KM rate (95% CI)</b>	<b>N events</b>	<b>KM rate (95% CI)</b>	<b>N events</b>	<b>KM rate (95% CI)</b>	<b>N events</b>	<b>KM rate (95% CI)</b>
MACE	338	8.2 (7.4-9.0)	200	18.3 (16.0-20.6)	283	9.7 (8.7-10.8)	21	14.6 (8.8-20.3)
All-cause death	137	3.3 (2.7-3.8)	87	7.7 (6.1-9.3)	62	2.1 (1.6-2.7)	10	6.9 (2.8-11.0)
Myocardial infarction	230	5.6 (4.9-6.3)	128	11.8 (9.9-13.8)	216	7.5 (6.5-8.4)	13	9.3 (4.5-14.2)
Stroke	23	0.6 (0.3-0.8)	18	1.7 (0.9-2.5)	27	0.9 (0.6-1.3)	1	0.7 (0-2.1)

**eFigure 1: Agreement Between Patient Report and Pharmacy Fill**

In 8,373 patients, persistence could be measured by both self-report and pharmacy fill data. Among these patients, 63.5% were either persistent or non-persistent by both metrics and the remaining 36.5% were discordant.

**eFigure 2. Agreement Between Patient Report, Pharmacy Fill, and Voucher Use in Intervention Arm Patients Who Used the Voucher at Least Once**

Persistence data from voucher use combined with pharmacy fill was used as a nominal gold standard in intervention arm patients who used a copayment assistance voucher at least once. Overall, persistence by voucher use combined with pharmacy fill and voucher use was 68.0%. Panel A shows persistence as measured by self-report compared with combined voucher use and pharmacy fill data; 26.9% of patients self-reporting persistence were non-persistent by both voucher use and pharmacy fill data; 24.1% of patients self-reporting non-persistence were persistent by either voucher use or pharmacy fill data. Panel B shows persistence as measured by pharmacy fill alone compared with combined voucher use and pharmacy fill data; 20.3% of patients classified as non-persistent by pharmacy fill data were persistent by voucher use data.
