

Figure S1. miR-299-5p exerts no effect on cell proliferation and apoptosis. (A) MTT assay of MDA-MB-231 and MCF-7 cells following transfection with miR-299-5p mimics or miR-299-5p inhibitor compared with the negative control, respectively. \* $P<0.05$ . (B) Cell apoptosis was detected by flow cytometry in MDA-MB-231 and MCF-7 cells transfected with miR-299-5p mimics or inhibitor. Apoptotic evaluation was carried out by calculating the percentage of apoptotic cells. Data are expressed as the mean  $\pm$  standard error of mean. MTT, Methylthiazolyldiphenyl-tetrazolium bromide; ctrl, control.

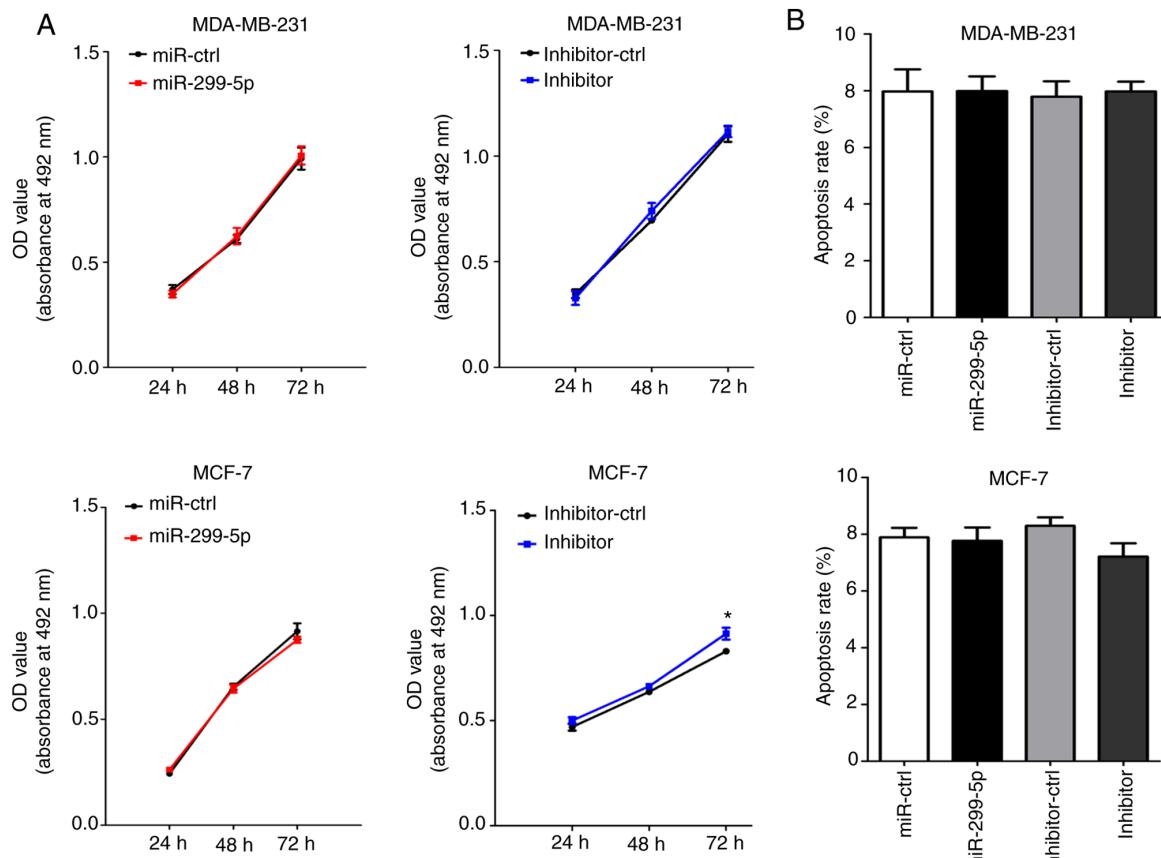

Figure S2. Tumorigenicity assay in nude mice subcutaneous transfection model. (A) Image of tumors derived from lentivirus-miR-ctrl and lentivirus-miR-299-5p MDA-MB-231 cells in nude mice (n=5). (B) Tumor volumes. (C) Tumor weights of 2 groups. Data are presented as the mean  $\pm$  standard error of mean.
