

Description of Additional Supplementary files

File name: Supplementary Data 1

Description: Association results of 28 loci in each Asian study

File Name: Supplementary Data 2

Description: Association results of 28 loci in each dataset of BCAC Europeans

File Name: Supplementary Data 3

Description: Regulatory functional annotation of SNPs in high LD ($r^2 > 0.8$) with newly associated SNPs in Asian populations using Haploreg

File Name: Supplementary Data 4

Description: Regulatory functional annotation of SNPs in high LD ($r^2 > 0.8$) with newly-associated SNPs in European populations using Haploreg

File Name: Supplementary Data 5

Description: Replication of breast cancer susceptibility SNPs previously reported

File name: Supplementary Data 6

Description: Independent secondary associations found within previously known loci: A conditional analysis
