

Title: Supplementary Movie 1.

Description: Molecular Dynamics (MD) simulation of the first trajectory (see Figure 5) reveals relatively stable mobility of the Extracellular Domain (ECD).

Title: Supplementary Movie 2.

Description: Molecular Dynamics (MD) simulation of the second trajectory (see Figure 5) reveals relatively stable mobility of the Extracellular Domain (ECD) similar to the first trajectory.

Title: Supplementary Movie 3.

Description: Molecular Dynamics (MD) simulation of the third trajectory (see Figure 5) reveals relatively large mobility of the Extracellular Domain (ECD).
