

A

TaCaIS5-A partial genomic region
1125bp

B

Supplemental Figure 5: *TaCaIS5* CRISPR guide location and pMM12 T-DNA structure. A *TaCaIS5-A* partial genomic region showing the orientation of the partial CDS covering exons 12-15 (orange blocks and arrow) and location of CRISPR guide target sequences (green arrows). B Schematic of the pMM12 binary plasmid T-DNA region transferred to wheat.
