

SUPPLEMENTARY FIGURES

Supplementary Figure 1. Sample clustering (GSE73731): sample dendrogram and trait indicator. In the heat map, the darker the color, the higher the degree of infiltration of the seven kinds of T cells.

Supplementary Figure 2. Heat map of the correlation between immune factors and hub genes. (A) Chemokines. (B) Receptors. (C) Immune-inhibitory factors. (D) Immune-stimulatory factors.
