

Supplementary Material

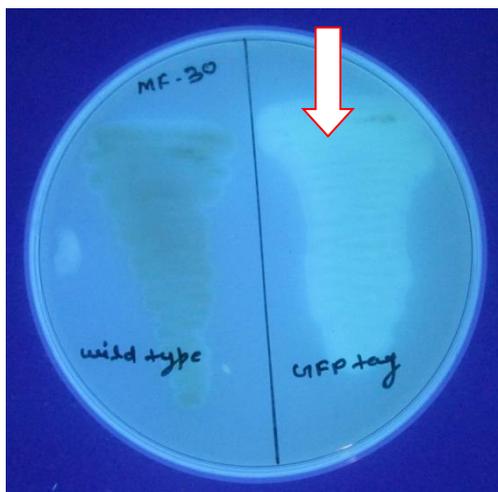

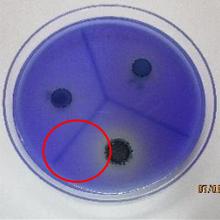

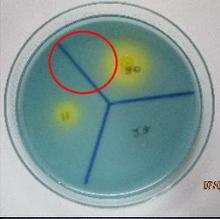

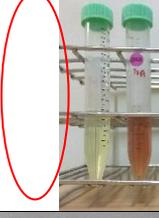

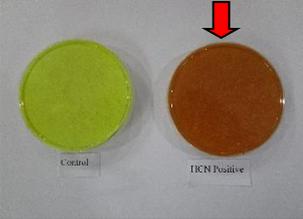

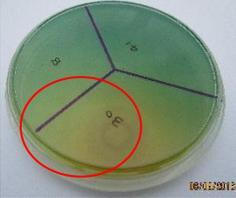

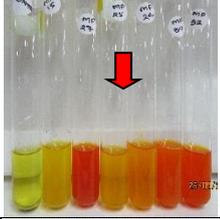

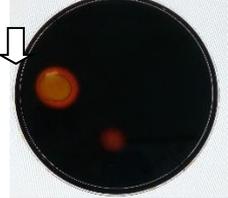

Figure S1. GFP-tagging of *Pseudomonas aeruginosa* MF-30.

Table S1. Qualitative estimation of plant growth promoting and biocontrol attributes in *Pseudomonas aeruginosa* MF-30.

S.No.	Plant growth promoting attributes	Presence/absence
1.	Phosphorus solubilization	+ve
2.	Potash solubilization	+ve
3.	Zinc solubilization	+ve
4.	IAA production	+ve
5.	HCN production	+ve
6.	Siderophore production	+ve
7.	Ammonia production	+ve
8.	Amylase activity	+ve
9.	Cellulase activity	+ve
10.	Pectinase activity	+ve
11.	Chitinase activity	+ve

S.No.	Plant growth promoting attributes	Presence/absence
1.	Phosphorus solubilization	
2.	Potash solubilization	
3.	Zinc solubilization	
4.	IAA production	
5.	HCN production	
6.	Siderophore production	
7.	Ammonia production	
8.	Amylase activity	

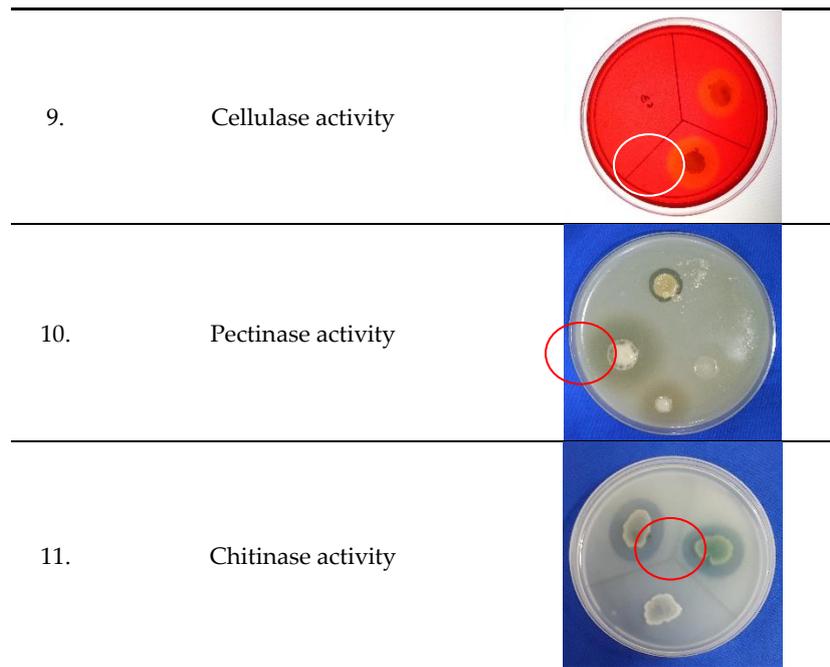

Figure S2. Qualitative estimation of plant growth promoting and biocontrol attributes in *Pseudomonas aeruginosa* MF-30.
