

Supplementary material

**Table S1 | A non-systematic overview of publications on topics relating feather pecking in laying hens.** Expansion on Table 1.

**Abbreviations:** serotonin (5-HT); somatodendritic 5-HT<sub>1A</sub> autoreceptor agonist (S-15535); Aggressive pecking (AP); beak trimming (BT); body weight (BW); corticosterone (CORT); Dopamine (DA); Emerge box (EB); environmental enrichment (EE); extreme feather pecking (EFP); feather pecking (FP); gentle feather pecking (GFP); high feather pecking (HFP); heterophil/lymphocyte (H/L) ratio; heart rate variability (HRV); human serum albumin (HuSA); low feather pecking (LFP); lipopolysaccharide (LPS); novel object (NO); open field (OF); plumage damage (PD) parent-stock (PS); Tonic immobility (TI); L-tryptophan (TRP).

**Strain(-type)s:** Columbian Blacktail (CB); Dekalb White (DW); ISA brown (ISA); Lohmann Brown (LB); Lohmann Brown-Classic (LBC); Lohmann Selected Leghorn (LSL); Norbrid 41 (NB); New Hampshire (NH); Rhode Island Red (RIR); Rhode Island White (RIW); White Leghorn (WL); Warren SSL (WSSL).
