

Table S1. SES, cognitive impairment, and BMI assignments.

Classification			
1. Body mass index (BMI) (kg/m ²)			
Score			Categories
<18.5	-	-	Underweight
18.5–22.9	-	-	Normal
23–27.4	-	-	Overweight
≥27.5	-	-	Obese
2. Socioeconomic status (SES)			
Personal Monthly Income (IDR)	Educational level	Occupation	Score
<1.000.000	Elementary school	Laid-off workers	1
1.000.000–2.000.000	Junior high school	Retirees	2
2.000.000–3.000.000	Senior high school	Self-working/service industries	3
>3.000.000	University or Above	Enterprise/Civil Servants	4
3. Cognitive function			
MoCA–INA [‡]	GDS-SF [‡]	ADL or IADL [‡]	Categories
>25	≤5	0 or 0	Without cognitive impairment
19–25	≤5e	0 or ≤2	Mild cognitive impairment

<19

-

≥ 1 or > 2

Severe cognitive
impairment
(dementia)

‡MOCA-INA = Montreal Cognitive Assessment-Indonesia version; GDS-SF = Geriatric

Depression Scale-Short Form; ADL = Activity of Daily Living; IADL = Instrumental

Activity of Daily Living
