

Supplemental data

Western blotting on the expression level of ABCB1 in the HEK293/ABCB1 cells incubated with 1.0 μ M WYE-354. Image J was used to quantify the relative density of each band. * $p < 0.05$, compared with the control group. Like KB-C2 cells, the expression of ABCB1 in HEK293/ABCB1 was not significantly change after the treatment of WYE-354 for 72 h
