

Figure S1. Effect of temperature on the biosynthesis of AgNPs using strain *Pseudoduganella eburnea* MAHUQ-39 was checked on the basis of UV-vis spectral analysis after 24 h of incubation with 1 mM concentration of AgNO₃.

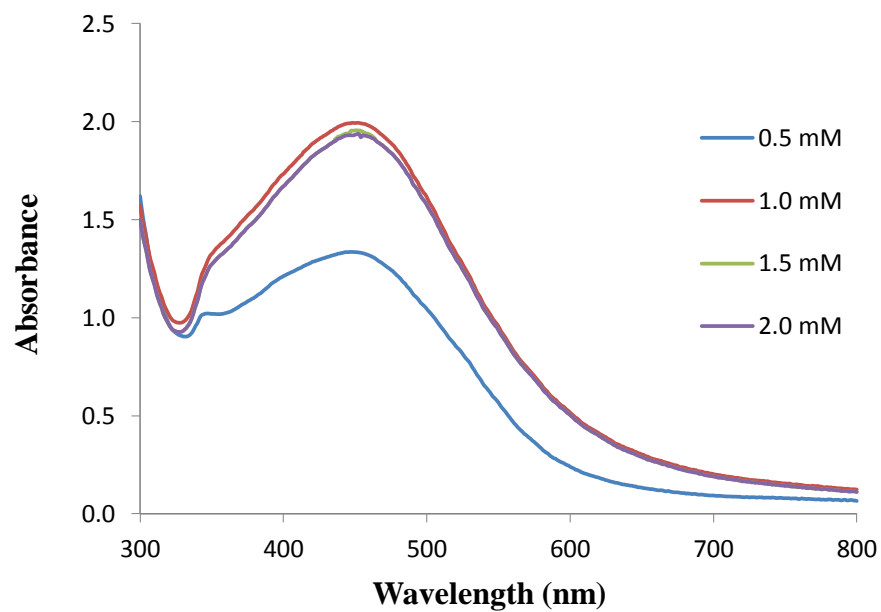

Figure S2. Effect of salt concentration (AgNO_3) on the biosynthesis of AgNPs using strain *Pseudoduganella eburnea* MAHUQ-39 was checked on the basis of UV-vis spectral analysis after 24 h of incubation at 30 °C.
