

S6 Fig. Co-expression network of the *PgERF* gene transcripts in 14 tissues of a 4-year-old ginseng plant. (A) The co-expression network constructed from 365 of the 397 *PgERF* transcripts at $P \leq 0.05$. (B) 17 clusters of the network. (C) Variation in number of nodes in the network of *PgERF* transcripts at different P -values. (D) Variation in number of edges in the network of *PgERF* transcripts at different P -values.
