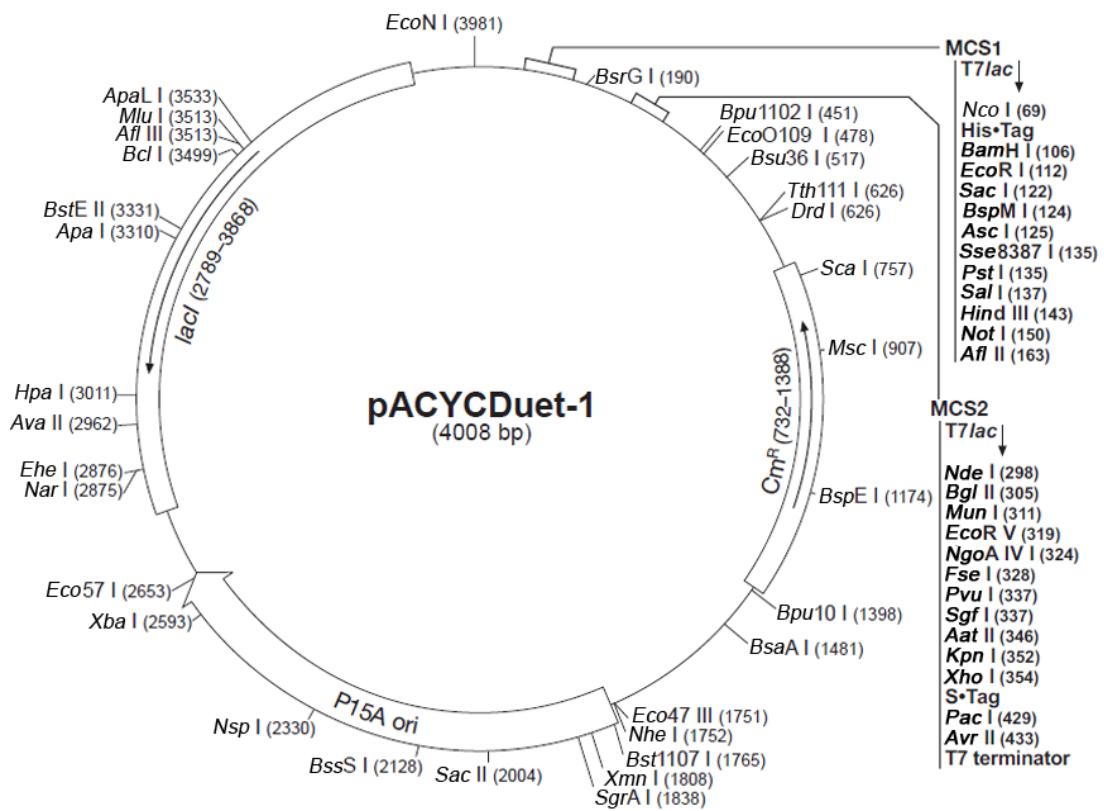

Fig. S1 The map of the plasmid pACYCDuet-1. The sequences of bacteriophage MS2 CP and maturase genes (81–1749 nt) were inserted into the MCS1 of the vector between *Bam*HI and *Hind*III, generating the recombinant plasmid for the expression of MS2 VLPs.

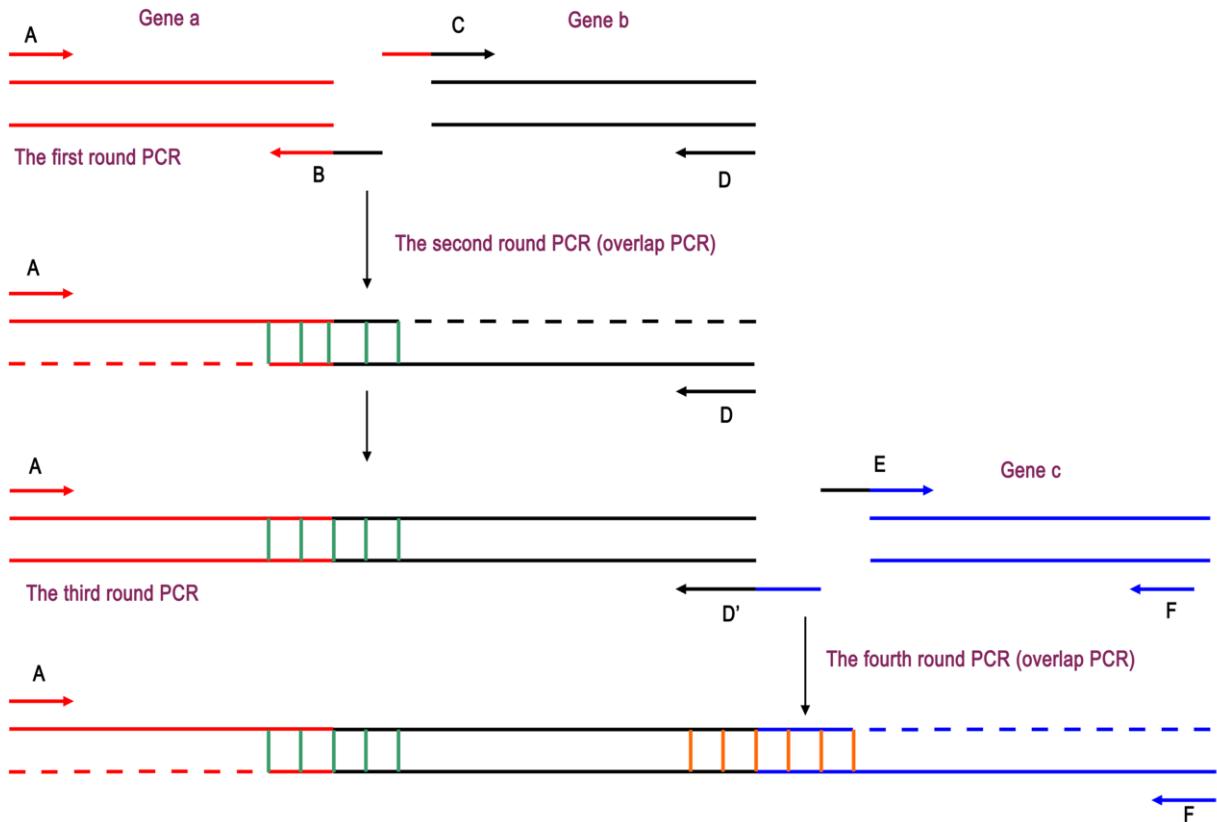

Fig. S2 Schematic diagrams for DNA fragments construction by overlapping extension PCR. In the first-round PCR, gene a and gene b represent C (nt 1211–2440, 630 bp) and S (nt 121–840,720 bp) regions of HBV DNA, the E6 (nt 26–820,795 bp) and L1 (nt 6151–7069, 919 bp) regions of HPV-16 DNA, the E6 (nt 101–1342, 1283 bp) and L1 (nt 6265–71246, 860 bp) regions of HPV-18 DNA. In the second round PCR for extension, primer sets HBV-SF and HBV-CR, HPV 16-E₆F and HPV 16-LR, and HPV 18-E₆F and HPV 18-LR were used to obtain overlapping fragments of 1.3 kb, 1.7 kb and 2.1 kb, respectively. Gene c representing the E1 region (nt 1103–2807, 1705 bp) of HPV-16 or E1 region (nt 2047–2987, 941 bp) of HPV-18 was amplified in the third round PCR, as well as the 1.7 kb and 2.1 kb DNA using primers HPV 16-E₆F and HPV 16-L₁R, and HPV 18-E₆F and HPV 16-L₁R. In the fourth round PCR for extension, primers HPV 16-E₆F and HPV 16-E₁R, and HPV 18-E₆F and HPV 18-E₁R were used to amplify the overlapping fragments of 3.5 kb for HPV-16 and 3 kb for HPV-18. Finally, a 6.5-kb fragment containing HPV-16 DNA of 3.5 kb and HPV-18 DNA of 3 kb were obtained using the same method.

TABLE S1 Primers used in the overlapping extension PCR

Primer	Sequence(5'-3')
HBV-SF	AATCTTCTCGAGGACTGGGGA
HBV-SR	AGGGGAAAAAGTTGCATGGTAGGGTCAAATGTATAACCAAAGAC
HBV-CF	GTCTTGTTACATTGAACCCTACCATGCAACTTTCCCT
HBV-CR	TTCCC GAGAT TGAGA TCTTC T
HPV 16-E ₆ F	AAGGGCGTAACCGAAATCG
HPV 16-E ₆ R	AAAAAAAATAGGGAAAACGTTACGGTGTGCCATTAACAGGTCTT
HPV 16-L ₁ F	AAGACCTGTTAATGGGCACAC GATGTCTCTTGGCTGCCTA
HPV 16-LR	GTTTGGCCTTCAATCCTGCT
HPV 16-L ₁ R	CGTTTAGAACCTGTACTGCATCTCGTTGGCCTCAATCCTGCT
HPV 16-E ₁ F	AGCAGGATTGAAGGCCAACCGAGATGCAGTACAGGTTCTAAAACG
HPV 16-E ₁ R	TGTGTTAGTATTTGTCCTGACACA
HPV 18-E ₆ F	TACTATGGCGCGCTTGA
HPV 18-E ₆ R	TGACAAATATCCAATGGTACCTCACTCCACTTCAGAACAGCCATAGC
HPV 18-L ₁ F	GCTATGGCTGTTCTGAAGTGGAAAGTGAGGTACCATTGGATATTGTCA
HPV 18-LR	ACGTACACGCACACGCTT
HPV 18-L ₁ R	TCAAATGCCATATCGCTTCAACGTACACGCACACGCTT
HPV 18-E ₁ F	CAAGCGTGTGCGTGTACGTTGAAACCGATATGGCATTGA
HPV 18-E ₁ R	TGTCTGTATGCCATGTTCCCT
