

Supplementary Figure 1. PLP₁₇₈₋₁₉₁-driven DTH is impaired in PLP_{ECD}-immunized but not PLP₁₇₈₋₁₉₁-immunized μ MT mice. Groups of WT and μ MT mice were immunized s.c. with either 100 μ g of PLP₁₇₈₋₁₉₁/CFA or PLP_{ECD}/CFA on day 0. Twenty days later, naïve or immune mice were challenged with PLP₁₇₈₋₁₉₁ or PBS alone in right and left ear pinnae, respectively. Ears were measured at 48h. ns = not significant; ** p < 0.01.
