

Supplemental Figure 5. eIF5A^{Hyp} expression pattern in the Pax5-expressing cell population in spleen tissue of control and T2D.

We evaluated the expression of eIF5A^{Hyp} in Pax5-expressing B cells in the spleens of donors with T2D and controls matched for age, gender and BMI. The fluorescent channels have been separated to better display the expression patterns of the Pax5-expressing B cells (A, B), eIF5A^{Hyp}-expressing cells (C, D), and the overlap between the Pax5-expressing and eIF5A^{Hyp}-expressing populations (E, F). All images are 20X.
