The next questions ask how many times your child has eaten certain foods over the past month.

We are not asking how much of each food s/he ate, we are asking how often they ate each food in the past month. Please respond by shading the box that best matches your answer.

EXAMPLE ONLY

Question: How often did your child eat/drink this food/beverage *over the last month*?

(Please shade *one* response on each line)

If, for example, during each average week over the past month, your child:

- had cake once per week
- had bananas three times per week
- had toast for breakfast each morning and a sandwich for lunch on each weekday, this means that, on average, they have had bread about twice a day
- had Coco Pops three times per week and Weetbix four times

Then this is how you would complete the questions:

	Never or less than once a month	1-3 times a month	Once a week	2-4 times a week	5-6 times a week	Once a day	2-3 times a day	4-5 times a day	6 or more times a day
Cakes, muffins, scones, muesli bars	<input type="radio"/> 1	<input type="radio"/> 2	<input checked="" type="radio"/> 3	<input type="radio"/> 4	<input type="radio"/> 5	<input type="radio"/> 6	<input type="radio"/> 7	<input type="radio"/> 8	<input type="radio"/> 9
