

Supplemental Table 2: Association of ART classes with incident anaemia among those ART naïve at baseline

ART class	Hazard ratio of incident anaemia (n=6,426)	
	Unadjusted	Adjusted <sup>a</sup>
NNRTI (REF)	1.00	1.00
PI	0.92 (0.67-1.247)	0.69 (0.45-1.06)
INSTI	1.73 (1.39-2.15)	1.10 (0.84, 1.44)

<sup>a</sup>Adjusted for age, sex, race/ethnicity, CNICS site, Hepatitis C virus status, CD4 count, viral load, kidney function (eGFR) and baseline haemoglobin

Abbreviations: ART: antiretroviral therapy, NNRTI: non-nucleoside reverse-transcriptase inhibitor, PI: protease inhibitor, INSTI: integrase strand transfer inhibitor
