

Crane Maintenance

for Whooping and Sandhill Cranes

Zeigler® Crane Diets are formulated as completely balanced diets for cranes (Whooping and Sandhill Cranes). These diets supply all needed nutrients as identified by leading avian nutritionists. In addition, the formulas are standardized to contain fixed quantities of the highest quality raw ingredients. Fed at National Zoological Parks and USDI Patuxent Wildlife Research Center. Crane Maintenance diet is for cranes that are growing. It also fed before and after the breeding season.

Feeding Suggestions

Crane Maintenance should be fed free choice as the total diet; no supplementation is necessary for normal healthy birds. If the birds go off feed, feeding small fish for a few days would help. As a guide, most birds will consume the equivalent of one-fifth of their body weight per day. However, feeding requirements will vary depending on species, environment, level of activity and stress factors. Fresh water should be available at all times.

Packaging

40 lb. box, (2-20 lb. nitrogen preserved bags)

Particle Size

3/16" Pellet, 1/4" long

Guaranteed Analysis

Crude Protein	Minimum	15.0%
Crude Fat	Minimum	3.5%
Crude Fiber	Maximum	4.0%
Ash	Maximum	7.0%
