

Extracorporeal shock wave therapy on radiation-induced chronic cystitis

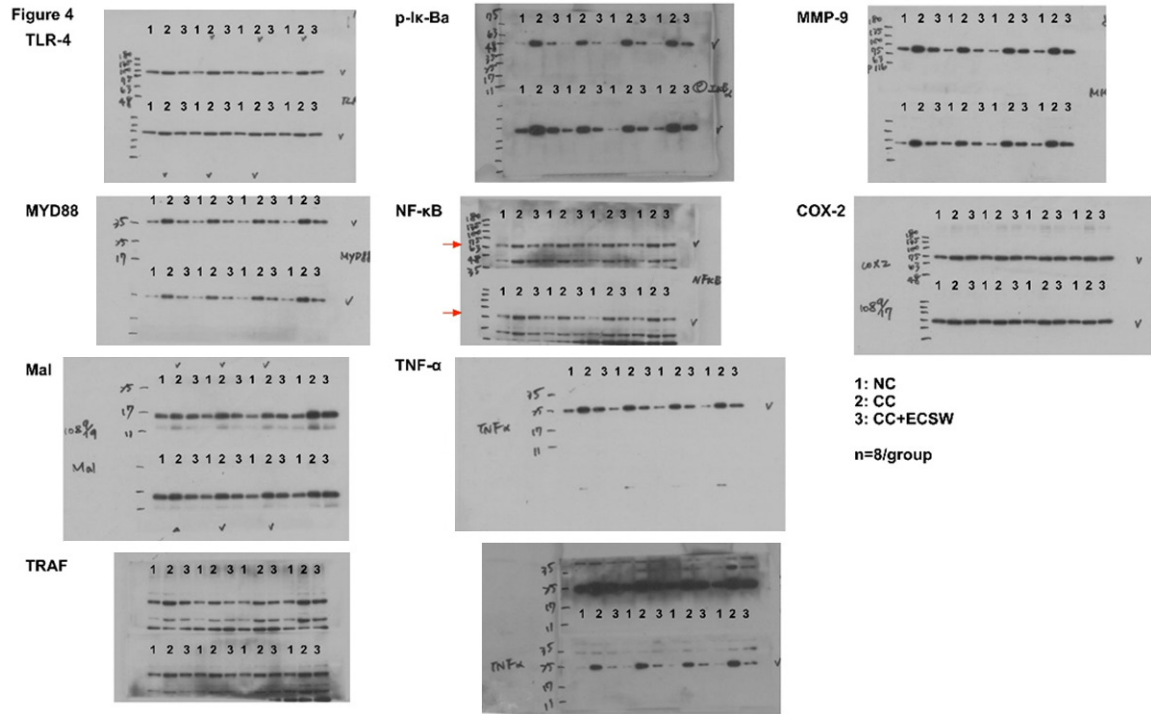

Supplementary Figure 1. Illustrating the raw materials of Western blot for identification of the expression of oxidative stress biomarkers.

Supplementary Figure 2. Illustrating the raw materials of Western blot for identification of the expression of apoptotic, fibrotic and DNA-damaged biomarkers.

Extracorporeal shock wave therapy on radiation-induced chronic cystis

Supplementary Figure 3. Illustrating the raw material of Western blot for identification of the expression of inflammatory signaling pathway.
