

S2 Figure. Plant-pollinator networks at each study park in Bangkok, Thailand over 12 months.

(A) Total plant-pollinator network using data from all 9 parks over all 12 months. Individual plant-pollinator networks from each study month (December 2017 – November 2018) at (B) Benjakitti Park, (C) Lumpini Park, (D) Phaya Thai Pirom Garden, (E) Santi Chai Prakan Public Park, (F) Santiphap Park, (G) Saranrom Park, (H) Somdet Saranrat Maneerom Public Park, (I) Vibhavadi Rangsit Forest Park, and (J) Wachirabenchathat Park. Upper bars represent pollinator species, lower bars represent plant species, and connecting lines represent interactions; widths are proportional to the number of individuals or the number of times that an interaction occurred. Pollinator species names can be found in S1 Table and plant species names can be found in S2 Table. Months in which no pollination interactions were observed are denoted as “N/A”.
