

## Additional File 1: Figure S1

S1A

S1B

S1C

A table titled "iDAR by population and rRNA" showing the number of iDAR events for each rRNA gene across different populations and gender groups. The populations are CEU, FIN, GBR, TSI, and YRI. Males are represented by purple/blue cells, and females by orange/yellow cells.

	12S	16S	5S	18S	5.8S	28S
CEU	males					
	females			2		12
FIN	males					
	females			1	1	3
GBR	males					1
	females			2		6
TSI	males			2		
	females					4
YRI	males				8	
	females			2	2
