Supplemental Table 4: Cholesterol, diglycerides, triglycerides. Data are shown as mean \pm SEM with p values adjusted for multiple comparisons using the Benjamini-Hochberg Adjustment.

Figure S1. The plasma ^1H NMR spectra of young adults, **older adults at baseline** and **older adults after n3-PUFA supplementation** (full scale)

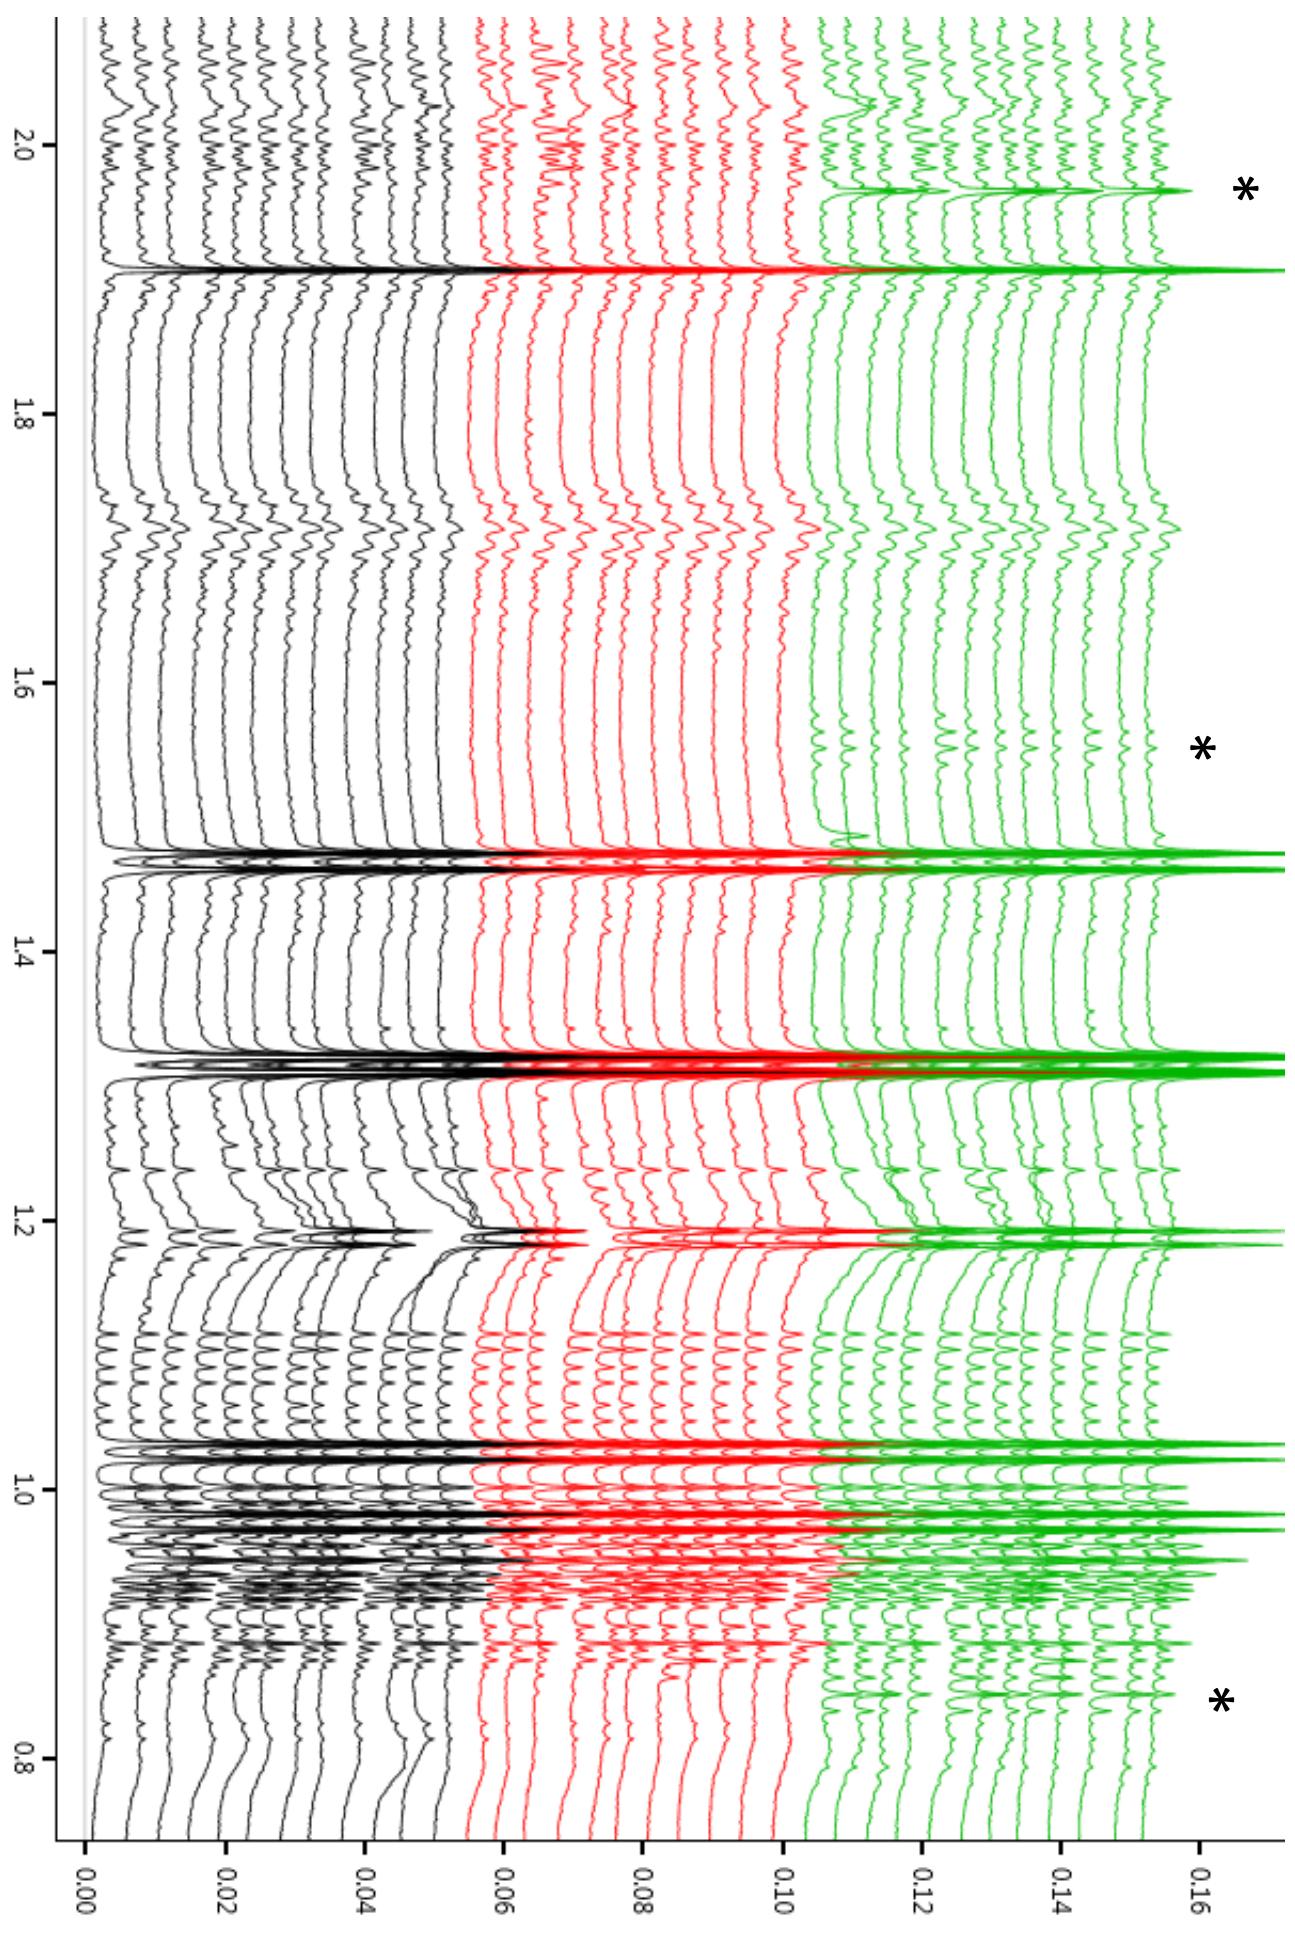

Figure S2. The plasma ^1H NMR spectra expansion: the signals present only in older adults after n3-PUFA supplementation are indicated by *

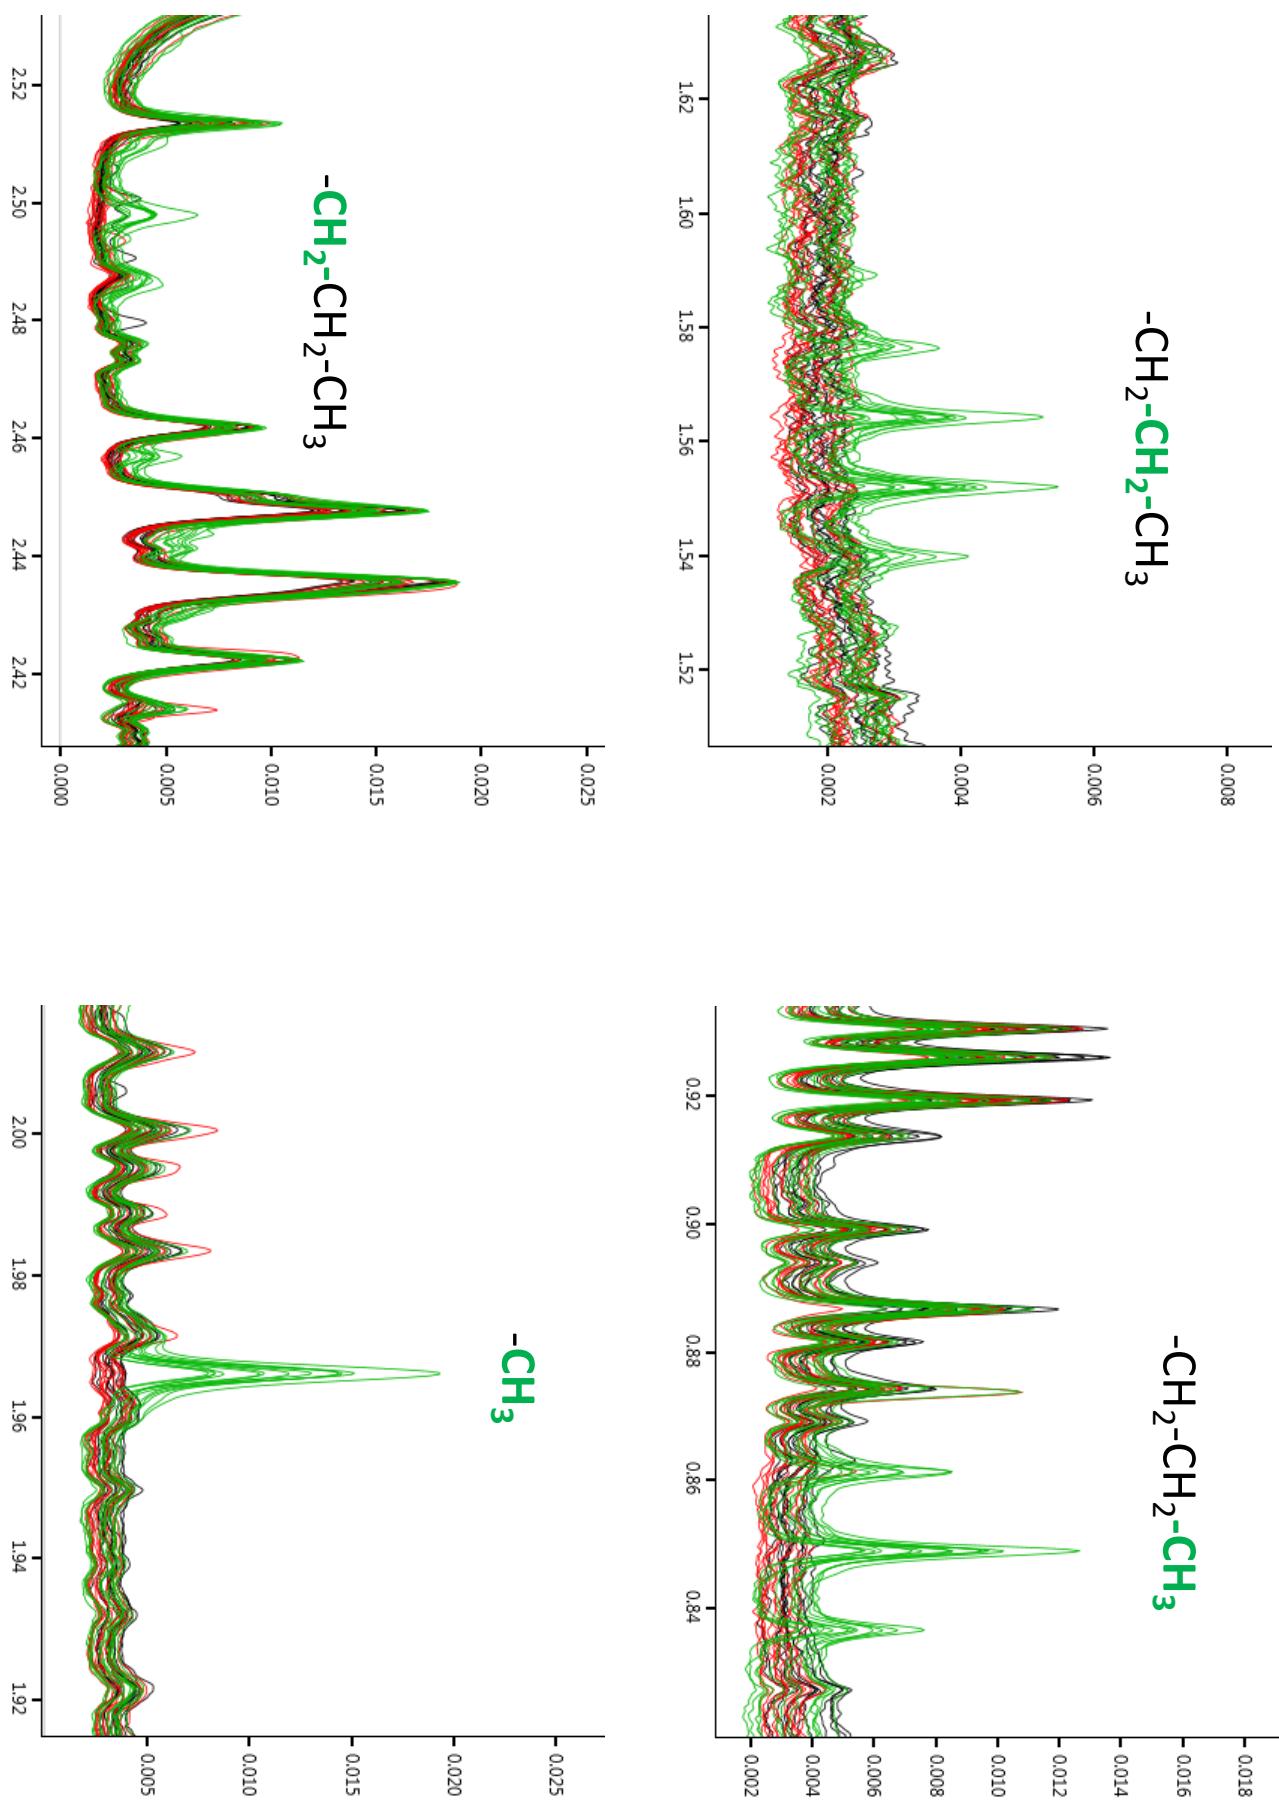

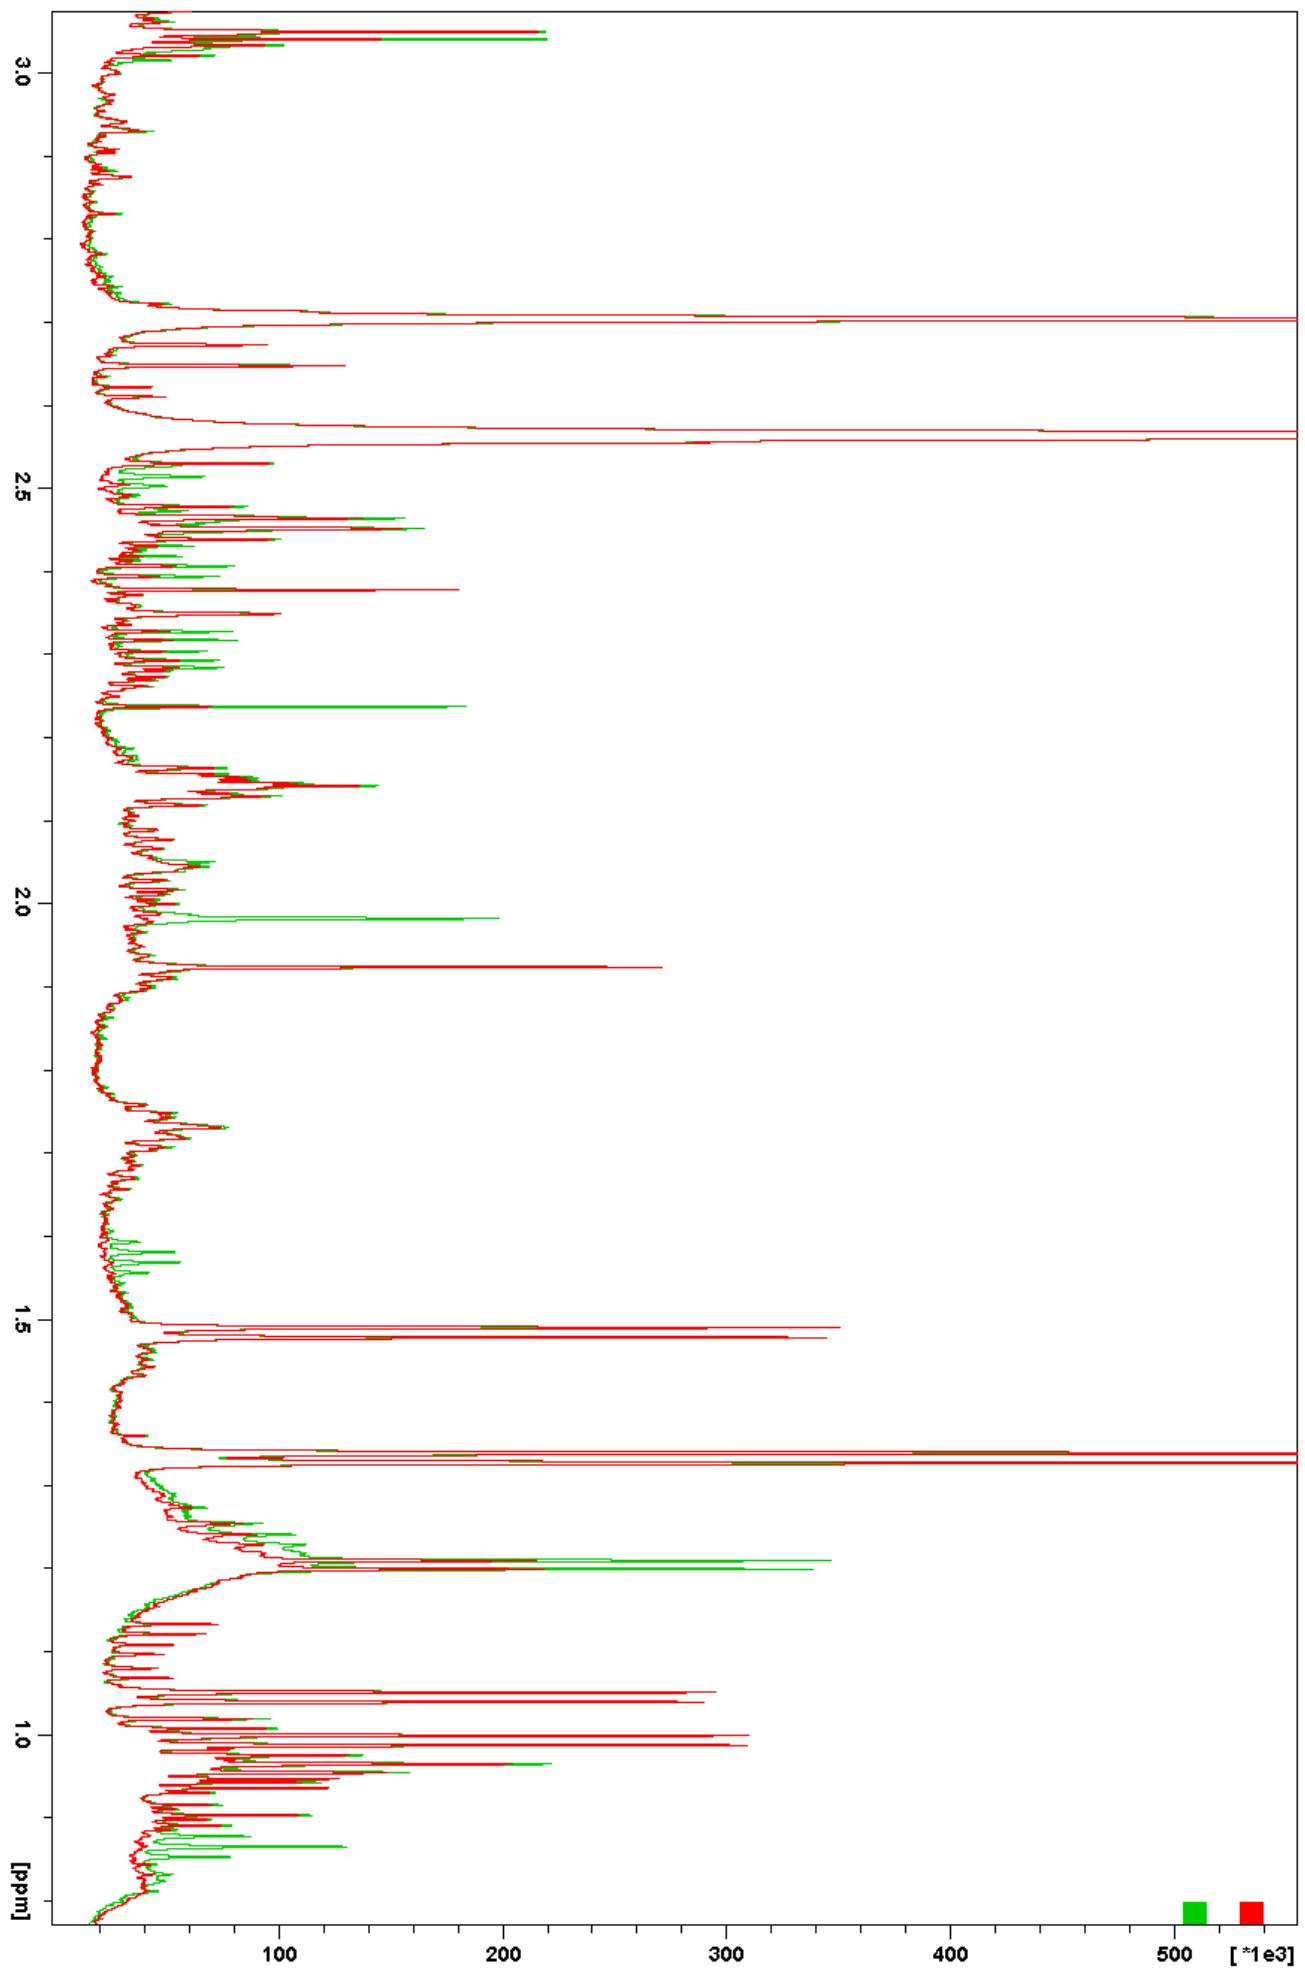

Figure S3. ^1H NMR spectra overlays: the signals present only in older adults after n3-PUFA supplementation with the assignments

Figure S4. The comparison between ^1H NMR spectra of older adult **before** and **after** n3-PUFA supplementation

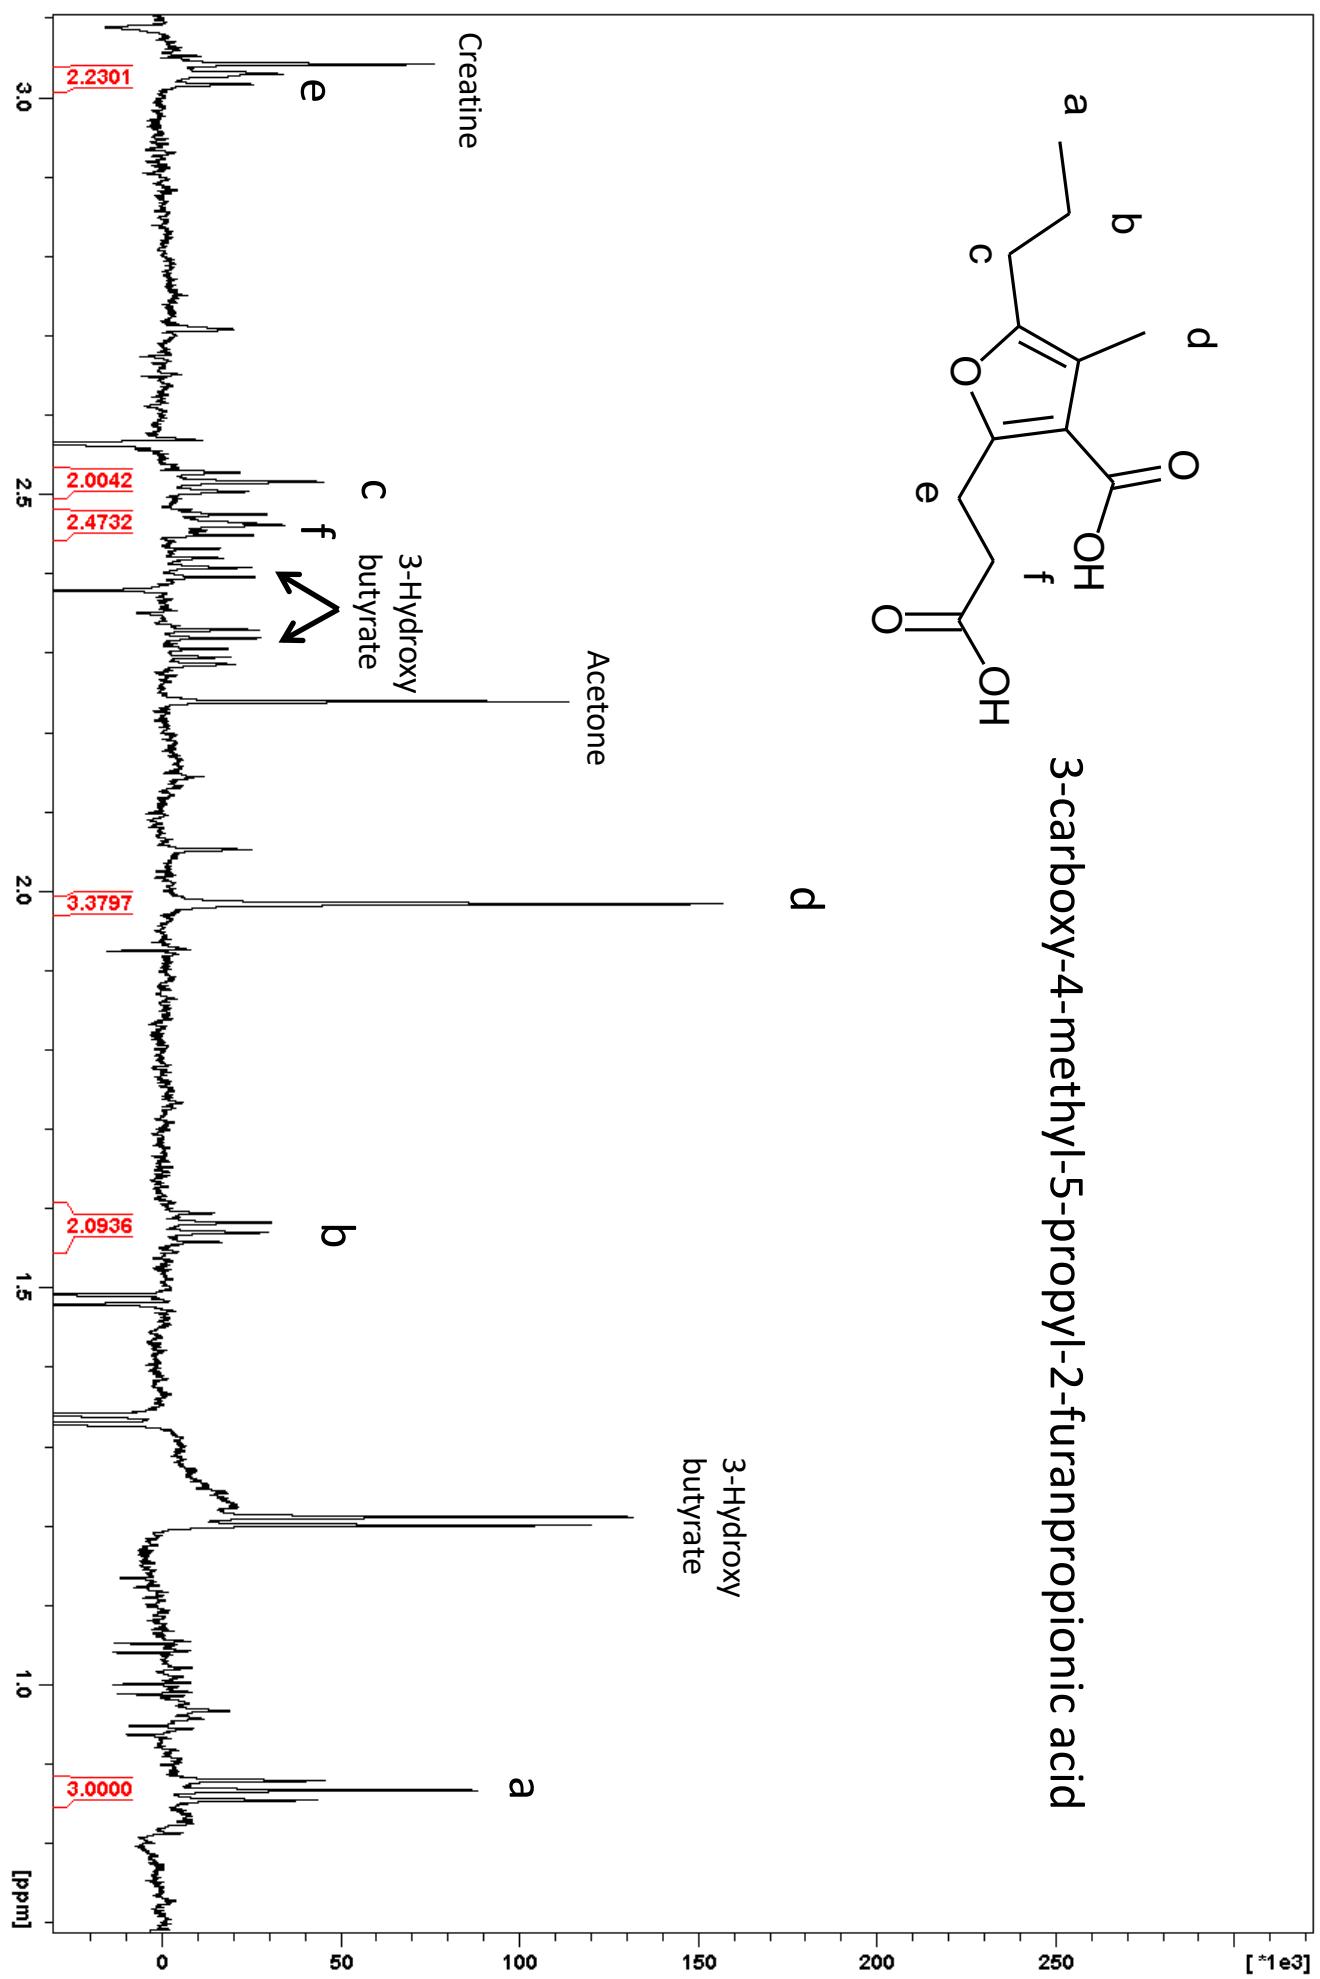

Figure S5. The ^1H NMR spectral difference between older adult before and after n3-PUFA supplementation with assignments

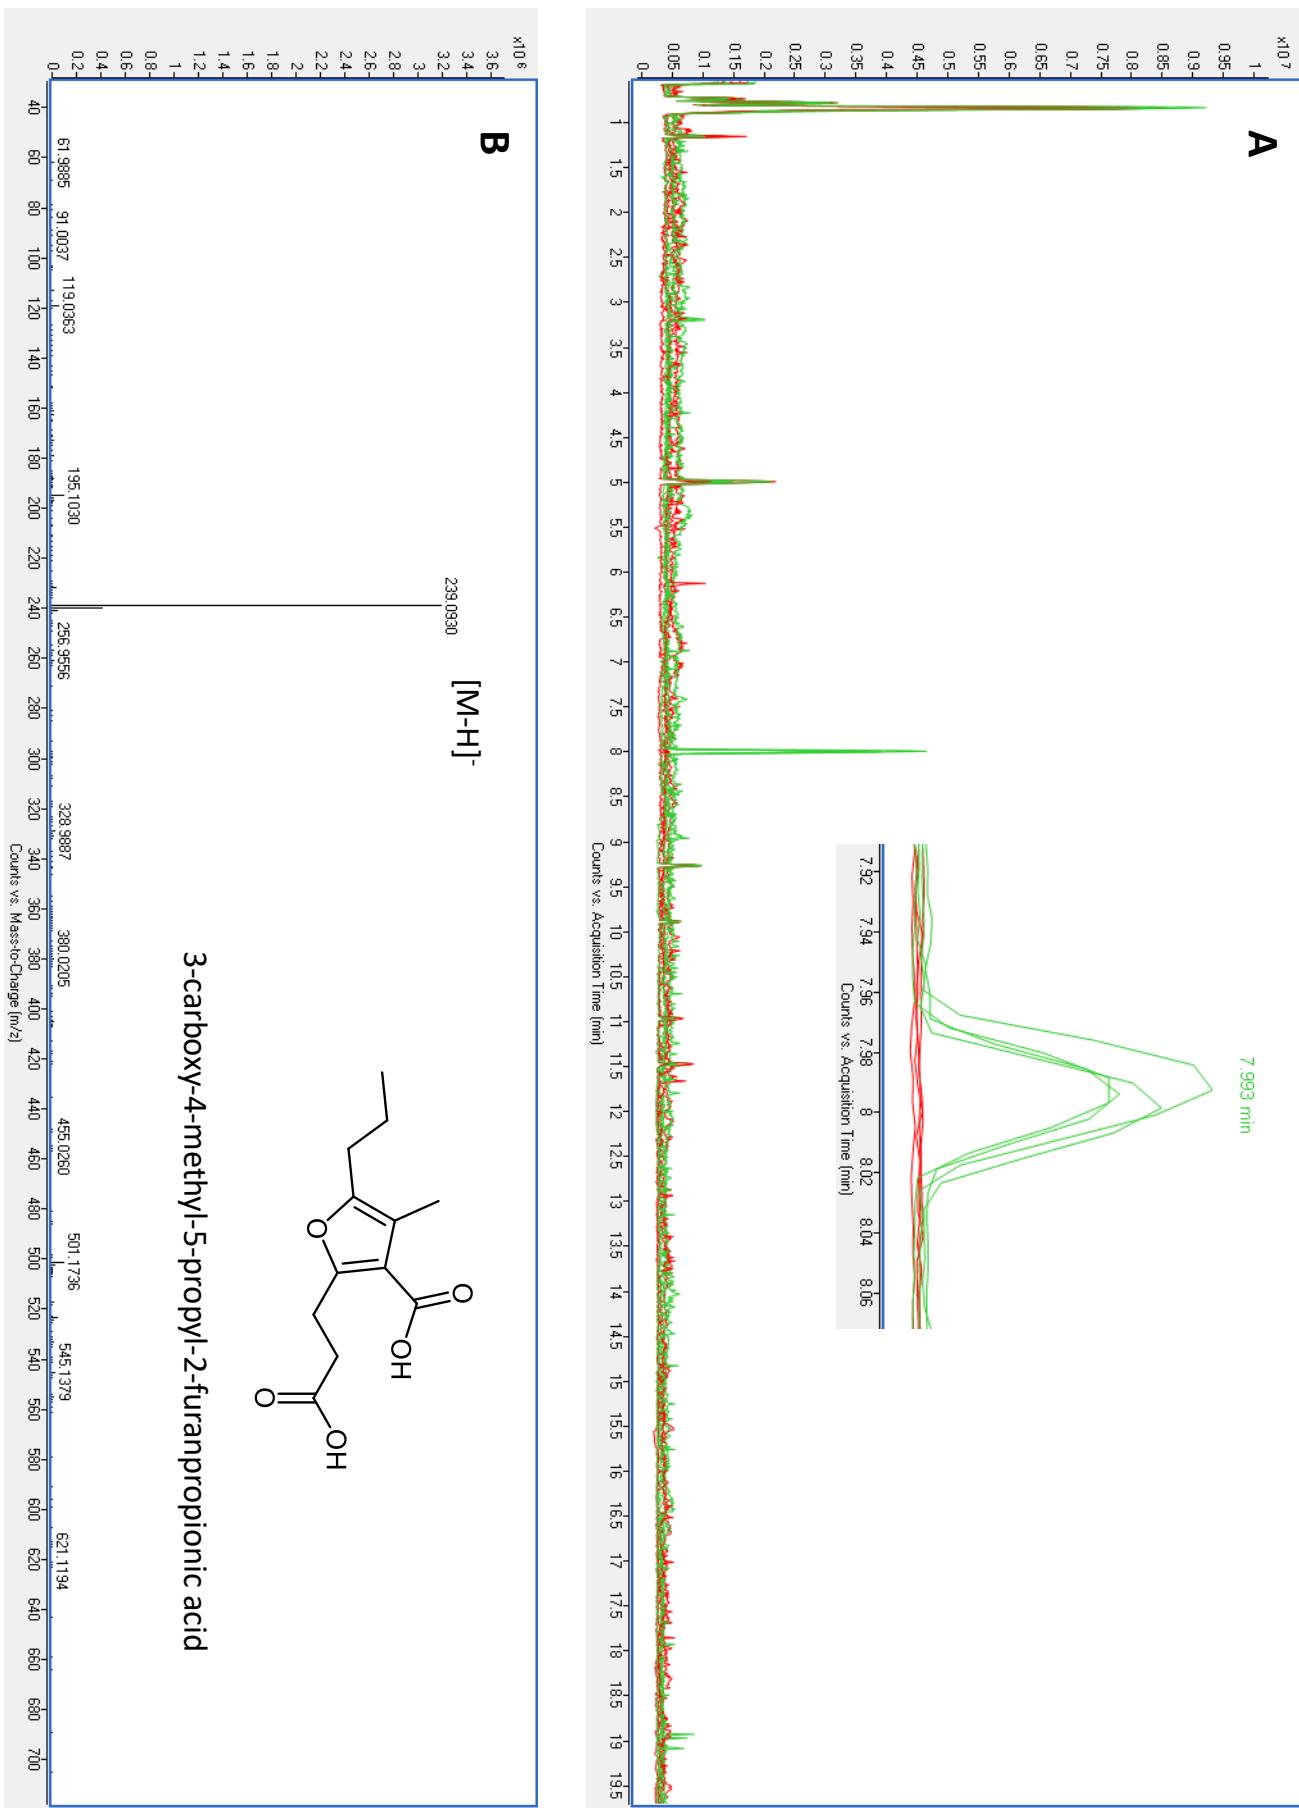

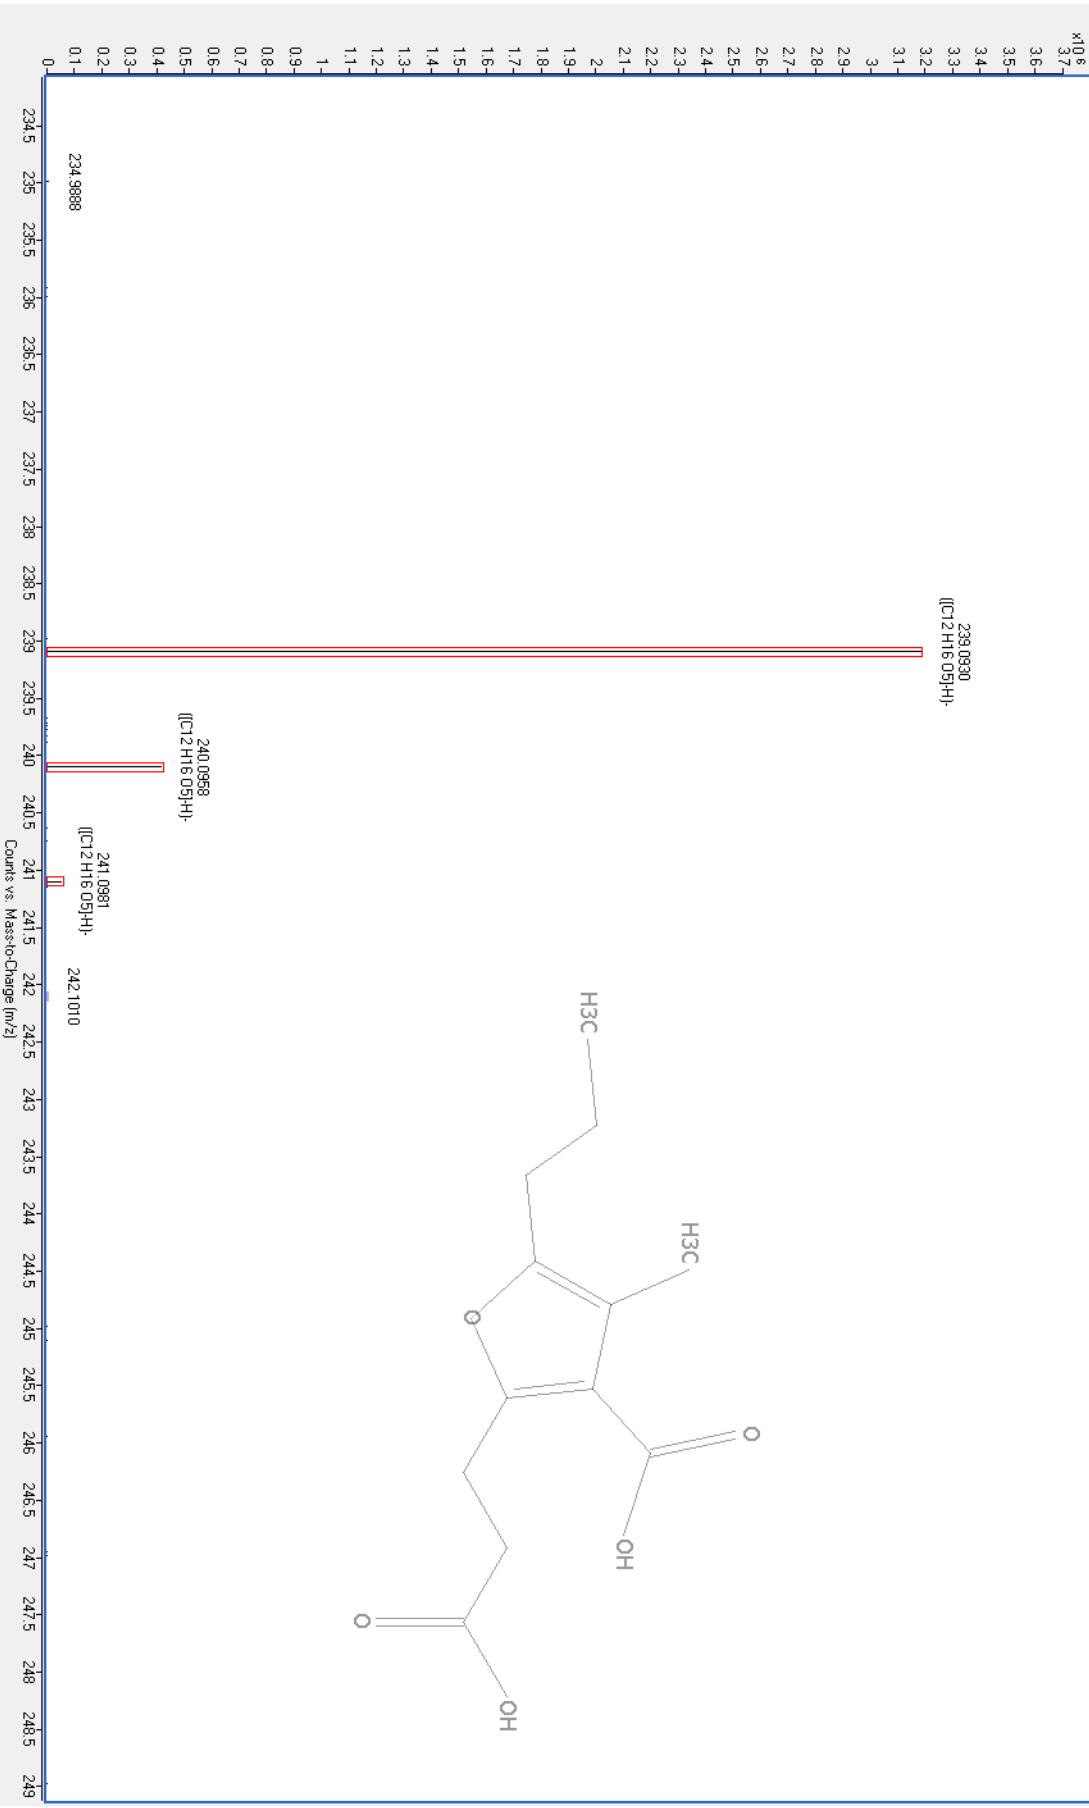

Figure S6. The plasma LC-MS chromatograms of four older adults **before** and **after** n3-PUFA supplementation (A) and negative ESI MS spectrum of the peak at 7.99 min

Figure S7. The library search (METLIN) of the negative ESI MS spectrum of the peak at 7.99 min

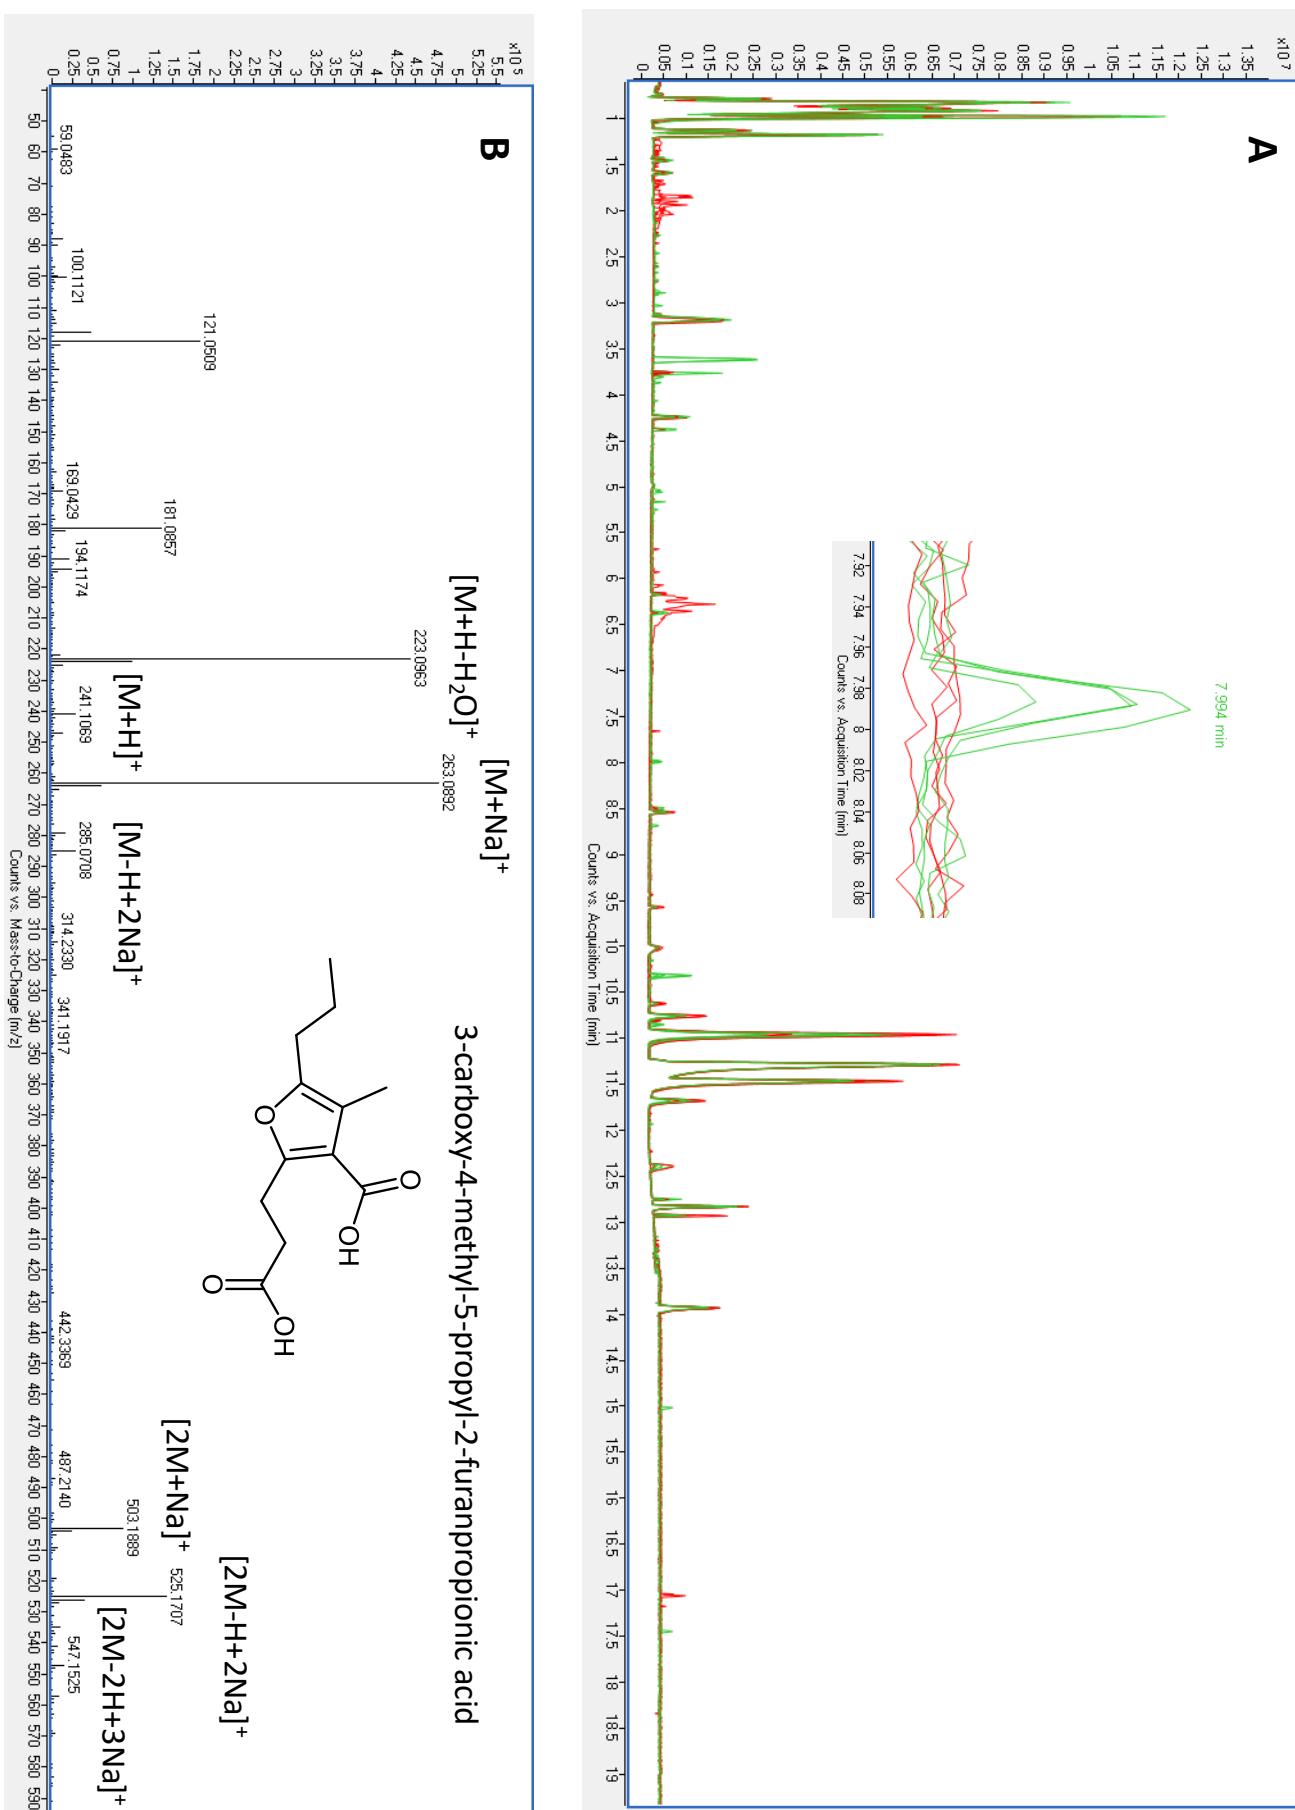

Figure S8. The plasma LC-MS chromatograms of four older adults **before** and **after** n3-PUFA **supplementation** (A) and positive ESI MS spectrum of the peak at 7.99 min

Figure S9. The library search (METLIN) of the positive ESI MS spectrum of the peak at 7.99 min

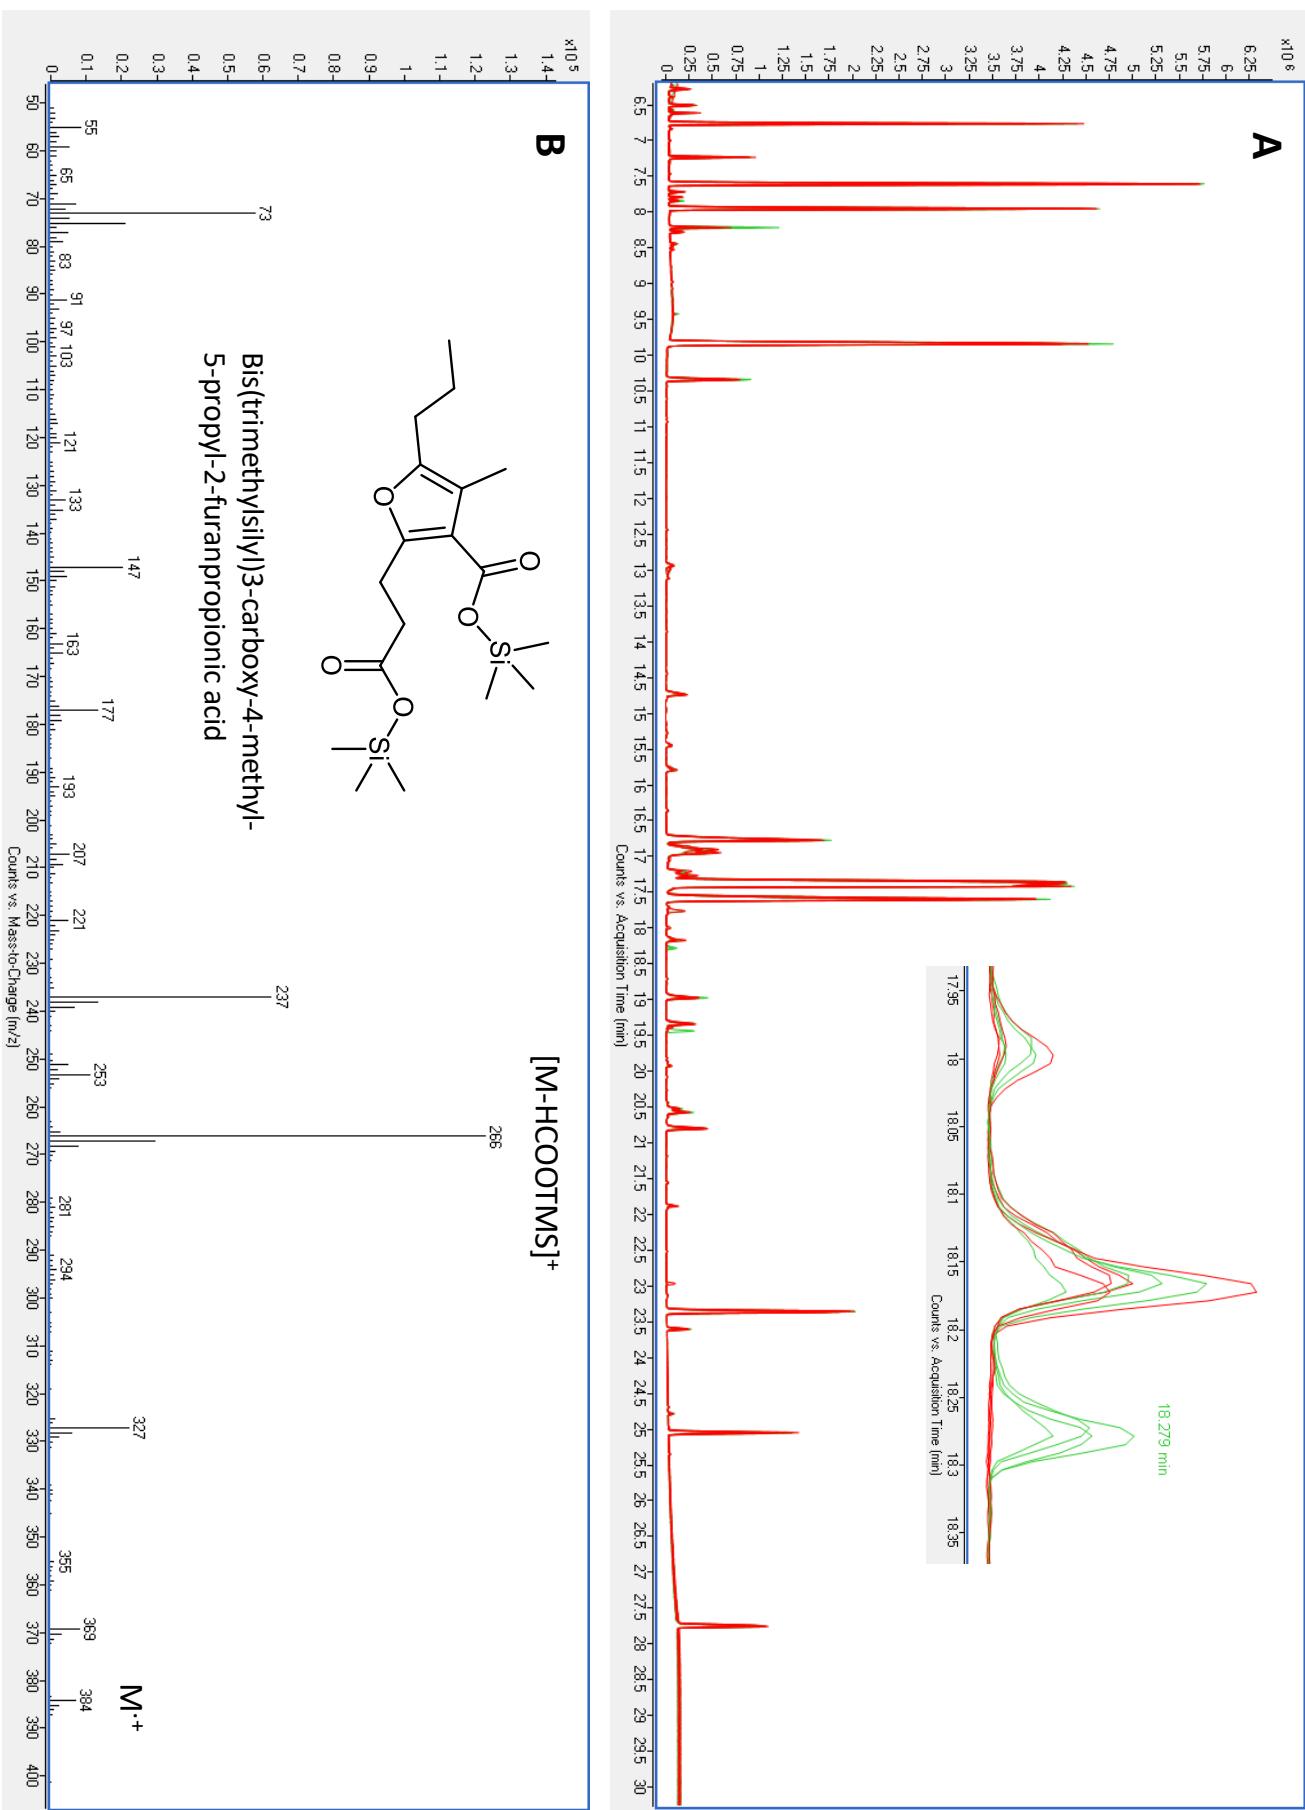

Figure S10. The plasma GC-MS chromatograms of four older adults **before** and **after** n3-PUFA **supplementation** (A) and positive EI MS spectrum of the peak at 18.28 min
