

Supplementary table Overview of the content and description of (outcome) measurements and timing of measurements at the Acute Geriatric Community Hospital compared to the measurements available in the two control groups.

	Description and/or instrument	H1	H2	P1	P3	P6
<i>1. Medical and demographical data</i>						
Sociodemographic data	Date of birth, age at admission, sex, level of education, living conditions, marital status	T A				
Data on admission	Time spent at the ED*, admission diagnosis, date and time of admission	T A				
Chronic conditions	Charlson Comorbidity Index ³⁸	T A				
Polypharmacy	Number of drugs	T A				
Mortality	Date of death				T A	
<i>2. Cognitive functioning</i>						
Cognitive impairment	Mini Mental State Examination (MMSE)	T A				
Delirium	Safety management system patient screening (VMS) ⁴¹	T				
	Confusion Assessment Method (CAM) ³⁹	TA ⁺				
	Delirium Observation Scale (DOS) ⁴²	T ⁺	T			
<i>3. Psychosocial functioning and quality of life</i>						
Apathy	Geriatric Depression Scale (GDS-3) ⁴³	A	A	A	A	
Social network and informal care	Presence and frequency of informal care	T		-	-	T
Quality of life and health status	EQ-5D ³⁶	T A		A	A	T A
<i>4. Physical functioning</i>						
Identifying at-risk-patients	ISAR-HP- Identifying Seniors at Risk score ⁴⁴	T				
Functional status	Activities of daily Living (ADL) modified Katz-ADL score ³⁵	T A	A	A	A	T
(Im)mobility	Using walking aid, information from the Katz-ADL questions on exercise	T A				
Handgrip strength	Jamar ⁴⁸	T A	A			
Gait speed	Short Physical Performance Battery SPPB ⁴⁹	T A	A			
Falling	Fall history	T A	-	A	A	T
	Falls in the AGCH	n/a	n/a	n/a	n/a	n/a
	Numeric Rating Scale (NRS) on the fear of falling ³⁴	A	A	A	A	-
Pain	Numeric Rating Scale (NRS) on pain ⁵⁰	T A	A	A	A	-
Fatigue	Numeric Rating Scale (NRS) on fatigue ⁵¹	T A	A	A	A	-
Nutrition	Short Nutritional Assessment Questionnaire (SNAQ) ⁵²	T A				
<i>5. Healthcare utilization and satisfaction with care</i>						
Medical care during admission	Diagnostics performed in the AGCH Readmission to university hospital		n/a			

	Length of stay at the AGCH					
Hospital readmission	Readmission rate to the hospital or AGCH			A	T A	T
Health care utilization	Home care, medical specialist care, temporary institutional care, primary care.	T		A	A	T
Satisfaction with Care	Eight question questionnaire ⁵³		-	-		

Grey tone= measurement in prospective cohort study at the AGCH.

H1= at admission, H2= at discharge, P1= one month after discharge, P3 = three months after discharge, P6 = six months after discharge.

T= available from *Transitional Care Bridge study(TCB)*¹

A= available from *Hospital- ADL study(H-ADL)*²

* and - =Not available from TCB or H-ADL

[†]=Single baseline measurement

n.a.= not applicable
