

The chart displays the estimated number of students in each year of birth from 2006 to 2013, relative to the 2012 examination year. The y-axis represents the year of birth, and the x-axis represents the examination year. The bars are stacked, with the total value for each birth year printed inside. A red dashed box highlights the data for 2006-2013.

Year of birth	Estimated students number in each year of birth
2006	194.0
2007	344.5
2008	330.1
2009	315.1
2010	307.0
2011	284.1
2012	265.1
2013	261.5
