

Editorial Note: This manuscript has been previously reviewed at another journal that is not operating a transparent peer review scheme. This document only contains reviewer comments and rebuttal letters for versions considered at Nature Communications .

Reviewers' Comments:

Reviewer #4:

Remarks to the Author:

Review on the manuscript 'The UPR sensor IRE1alpha and the adenovirus E3-19K glycoprotein sustain persistent and lytic infections' by Prasad et al..

The authors have addressed the critical comments by all reviewers. I recommend accepting this manuscript. It is very interesting work and it was much improved by the extensive revisions.
