

Supplementary Table 1.

Overall Demographic and Screening Data for Study Completers (N=30).

	Mean or N	SD
Age (years)	26.9	7.1
Caucasian ^a	21	N/A
Cigarettes/day ^b	0.03	0.2
Volume ECIG liquid used/day (ml) ^b	6.3	5.7
Preferred Liquid concentration (mg/ml) ^b	8.5	4.2
Preferred PG concentration ^b	39.0	21.6
Preferred VG concentration ^b	61.3	21.6
Preferred Device Wattage ^b	54.7	42.9
Duration ECIG use (months) ^b	16.6	12.3
Fagerström TND ^c	3.7	2.4
Penn State Dependence ^d	8.8	4.8

^aRemaining participants were Asian (N=4), Black/African American (N=2), Other (N=2), and more than one race (N=1).

^bAccording to self-report.

^cThe Fagerström Test for Nicotine Dependence: 0 (low dependence) to 10 (high dependence; Heatherton et al., 1986)

^dPenn State Electronic Cigarette Dependence Index: 0 (low dependence) to 14 (high dependence; Foulds et al., 2015)
