

Supplementary material to “Metabarcoding reveals that a non-nutritive sweetener and sucrose yield similar gut microbiota patterns in Wistar rats”

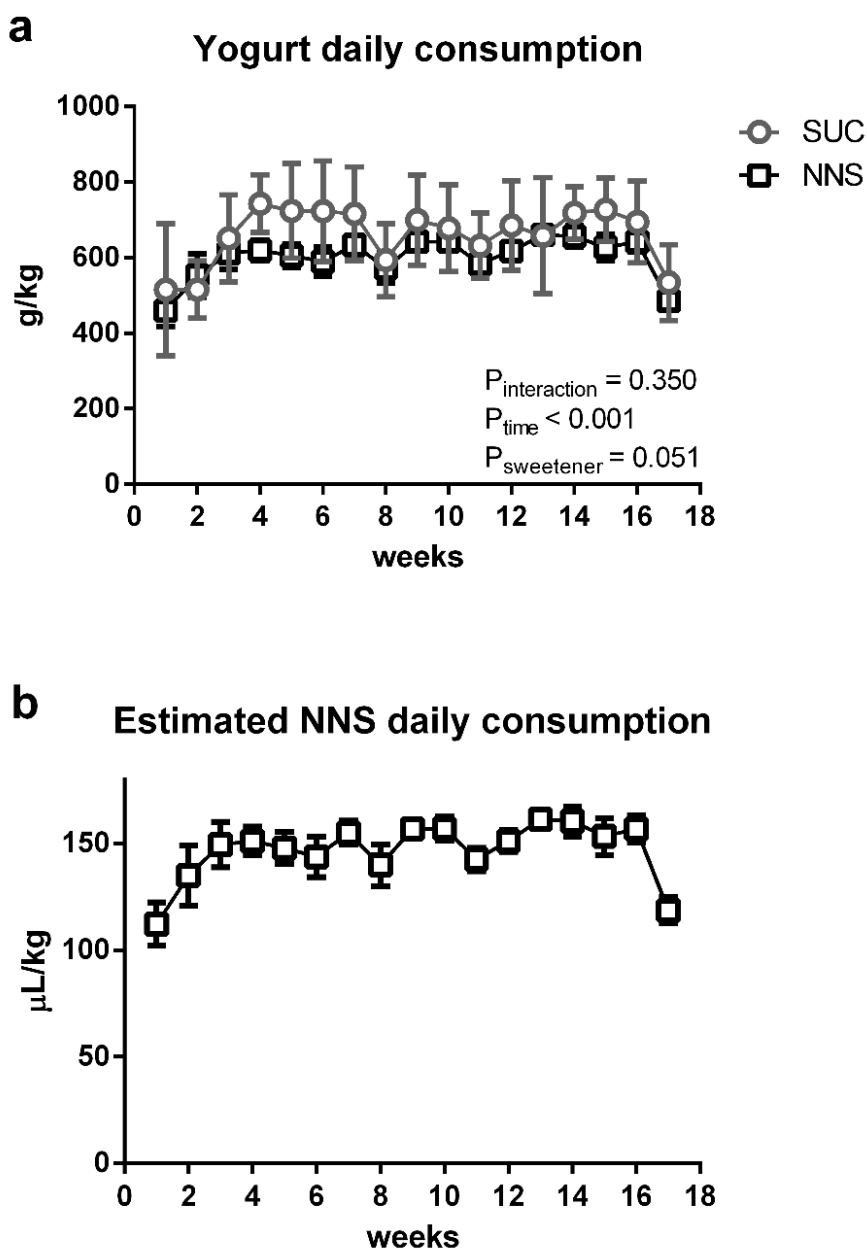

Figure S1 - Yogurt (a) and NNS intake (b) over time. Yogurt intake was evaluated weekly and corrected for body weight. NNS intake was estimated out of the final concentration of sweetener present in the yogurt solution (0.17%) and corrected for body weight. NNS, non-nutritive sweetener (n = 10); SUC, sucrose (n = 9)
