

Supplementary Figure S3

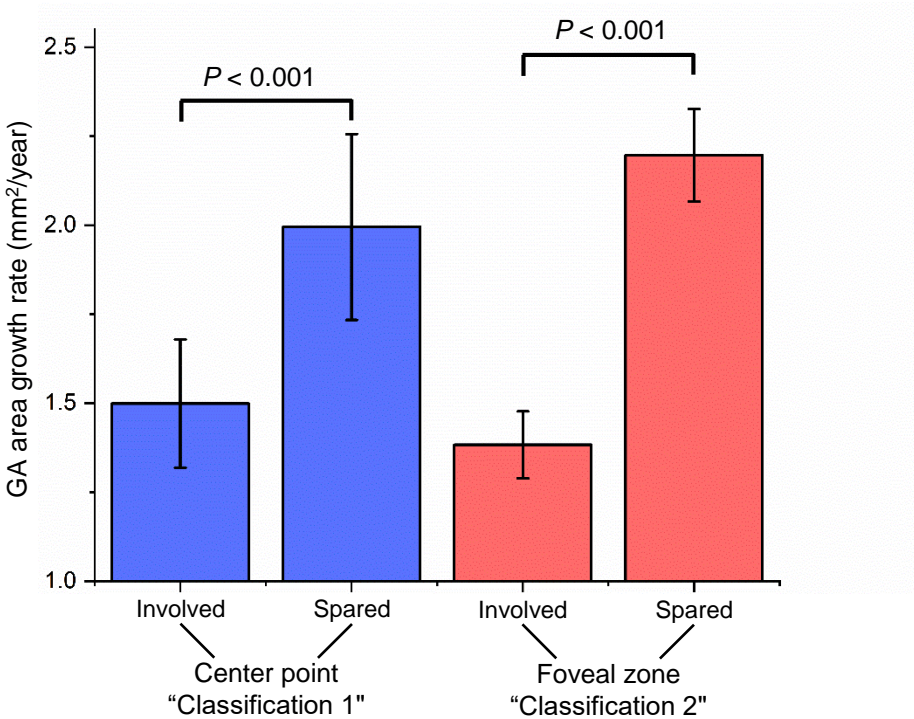

Figure S3. GA area growth rates (mm²/year) in 4 GA location groups. The GA area growth rate in each group was calculated from a random-effects meta-analysis shown in Supplementary Figure S1. The *P* values between the pair in classification 1 (i.e. classifying GA lesions based on center point involvement) and between the pair in classification 2 (i.e. classifying GA lesions based on foveal zone involvement) are from the random-effects meta-analyses shown in Supplementary Figure S2. The error bar represents the standard error. GA, geographic atrophy.
