Supplementary Figure 5. PVT1 regulates HIF-1 α through binding TIF1 β . **A**, Immunoprecipitation and WB analyses of effects of H3K9ac association with NCOA1, NCOA2, NCOA3, TIF1 α , TIF1 β , and TIF1 γ . **B-C**, TIF1 β but not TIF1 α rescues PVT1 knockdown-inhibited HIF-1 α mRNA stability. Error bars \pm SD. * P <0.05. ** P <0.01. *** P <0.001. Data are representative from three independent experiments.
