

Mock

miR-96 mimic

miR-183 mimic

Negative mimic

S9 Data. Immunofluorescence images of vimentin expression in MCF-7_M cells. Images from three independent experiments (one experiment per row). Data used to quantitate relative vimentin expression in each field (number of vimentin positive cells divided by the total number of cells). Images presented in Fig 4C; quantitation presented in Fig 4D; statistical analysis in S7 Data.
