Professor Peter Humphries,  
Department of Medical Genetics,  
Trinity College Dublin

Dear Peter

I am very pleased that you will include reference to the Newfoundland ADRP family with the RPE65 D477G mutation in your paper on the family from Ireland with this mutation. It is important to note the consistent phenotype in families with this mutation occurring in other countries.

Thank you,

A handwritten signature in black ink that reads "Jane S. Green".

Jane S. Green, PhD
