

Supplementary Figure 1. Correlation between the percentage of CD19⁺ B cells and laboratory parameters. (A) The correlation between percentage of CD19⁺ B cells with ESR. (B) The correlation between percentage of CD19⁺ B cells with RF. (C) The correlation between percentage of CD19⁺ B cells with CRP. r , correlation coefficient; p , significant level. $p < 0.05$ indicates statistical significance.

Supplementary Figure 2. Correlation between the percentage of CD19⁺CD27⁺ B cells and laboratory parameters. (A) The correlation between percentage of CD19⁺CD27⁺ B cells with ESR. (B) The correlation between percentage of CD19⁺CD27⁺ B cells with RF. (C) The correlation between percentage of CD19⁺CD27⁺ B cells with CRP. r , correlation coefficient; p , significant level. $p < 0.05$ indicates statistical significance.
