

SUPPLEMENTAL MATERIAL

Table S1. Treatment Poolability Analysis

Variable	No Envelope	Envelope	P-value
Length of hospitalization (days)*	16.5	21.2	0.3422
Number of hospitalizations*	1.5	1.9	0.1528
HCU intensity [†]			
No system removal, had at least one inpatient hospitalization	5	3	0.7436
No system removal, no inpatient hospitalization	2	1	
System removed only, no new system implanted	10	9	
System removed, new system implanted	27	13	
* T-test			
† Chi-squared test			

Table S2. Infection Cost Poolability Analysis

Cost	Pooled	No Envelope	Envelope	P-value
Medicare FFS	\$26,867	\$22,891	\$29,730	0.14
Medicare Advantage	\$57,978	\$51,890	\$62,361	0.25
Hospital	\$55,547	\$51,171	\$58,697	0.60
Patient Medicare FFS	\$2,156	\$2,013	\$2,259	0.70
Patient Medicare Advantage	\$1,658	\$1,743	\$1,596	0.71

Table S3. Infection Diagnosis Codes

	Questionnaires (Subjects) Completed
ICD-9	Infection due to a cardiac device (996.61), Other postoperative infection (998.59), Septicemia (38.0, 38.1, 38.11, 38.12, 38.19, 38.2, 38.3, 38.4, 38.41, 38.42, 38.43, 38.44, 38.49, 38.8, 38.9), Bacteremia (790.7), Endocarditis (421.0, 421.1, 421.9), Infection due to unspecified device (996.60), Candidiasis (112.5), Sepsis (995.91)
ICD-10	Infection due to a cardiac device (T82.7XXA, T82.7XXD, T82.7XXS), Other postoperative infection (T81.4XXA), Sepsis (A40.9, A41.2, A41.01, A41.02, A41.1, A40.3, A41.4, A41.50, A41.3, A41.51, A41.52, A41.53, A41.59, A41.89, A41.9, B37.7), Bacteremia (R78.81), Endocarditis (I33.0, I33.9)

Table S4. Quality of Life Utilities Derived From EQ-5D Health States

Change in EQ-5D Utility Following Major CIED Infection within 12-Months					
EQ-5D Assessment	Questionnaires (Subjects) Completed	Mean ± SD	Adjusted Mean 95% CI*	Adjusted Mean Difference 95% CI*	P-value[†]
Baseline	67 (67)	0.83 ± 0.14	0.83 (0.79-0.87)	--	--
Infection Diagnosis	31 (31)	0.75 ± 0.19	0.75 (0.69-0.80)	0.09 (0.03-0.14)	0.004
1-Month Post-Infection	26 (25)	0.73 ± 0.20	0.73 (0.67-0.79)	0.10 (0.04-0.17)	0.001
3-Month Post-Infection	30 (30)	0.77 ± 0.23	0.76 (0.70-0.82)	0.07 (0.01-0.13)	0.02
6-Month Post-Infection	42 (41)	0.83 ± 0.15	0.81 (0.76-0.86)	0.02 (-0.03-0.07)	0.423

* Adjusted mean and adjusted mean difference from baseline and corresponding 95% confidence intervals from a repeated measures analysis of variance model.
[†] P-value for comparison to value at baseline.

We explored the change in quality of life using alternative covariance structures that account for the possibility of a higher correlation between quality of life measurements in closer proximity to each other. Here we provide the results using first-order autoregressive covariance structure.

Table S5. Quality of Life Utilities Derived From EQ-5D Health States

Change in EQ-5D Utility Following Major CIED Infection within 12-Months					
EQ-5D Assessment	Questionnaires (Subjects) Completed	Mean ± SD	Adjusted Mean 95% CI*	Adjusted Mean Difference 95% CI*	P-value [†]
Baseline	67 (67)	0.83 ± 0.14	0.84 (0.80-0.88)	--	--
Infection Diagnosis	31 (31)	0.75 ± 0.19	0.75 (0.70-0.81)	0.09 (0.03-0.14)	0.003
1-Month Post-Infection	26 (25)	0.73 ± 0.20	0.73 (0.66-0.79)	0.11 (0.05-0.18)	0.001
3-Month Post-Infection	30 (30)	0.77 ± 0.23	0.75 (0.69-0.81)	0.09 (0.03-0.16)	0.006
6-Month Post-Infection	42 (41)	0.83 ± 0.15	0.80 (0.75-0.86)	0.04 (-0.02-0.10)	0.239

* Adjusted mean and adjusted mean difference from baseline and corresponding 95% confidence intervals from a repeated measures analysis of variance model.
[†] P-value for comparison to value at baseline.

These results suggest the same interpretation using either methodology with a slight numeric decrease in the quality of life at the 3- and 6-month values.

Figure S1. QOL Poolability Analysis. QOL at time of infection diagnosis. Box-and-whisker plots represent distribution of data as follows: solid line = median; box = interquartile range; whiskers = minimum and maximum within 1.5 times interquartile range; dots = outliers (outside of 1.5 times interquartile range). QOL = quality of life

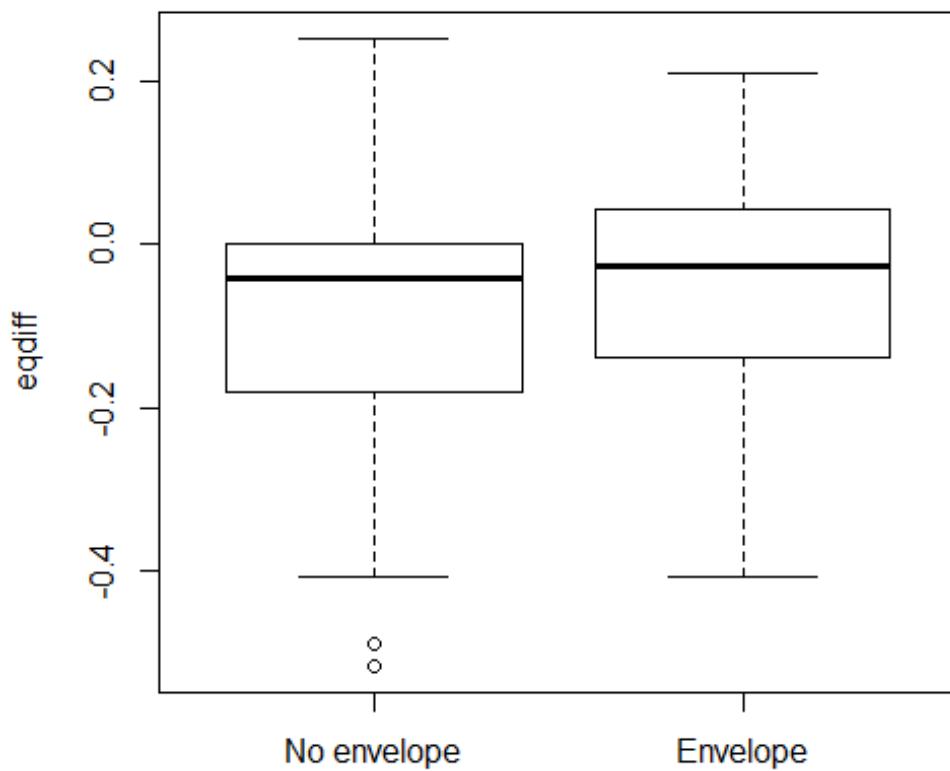

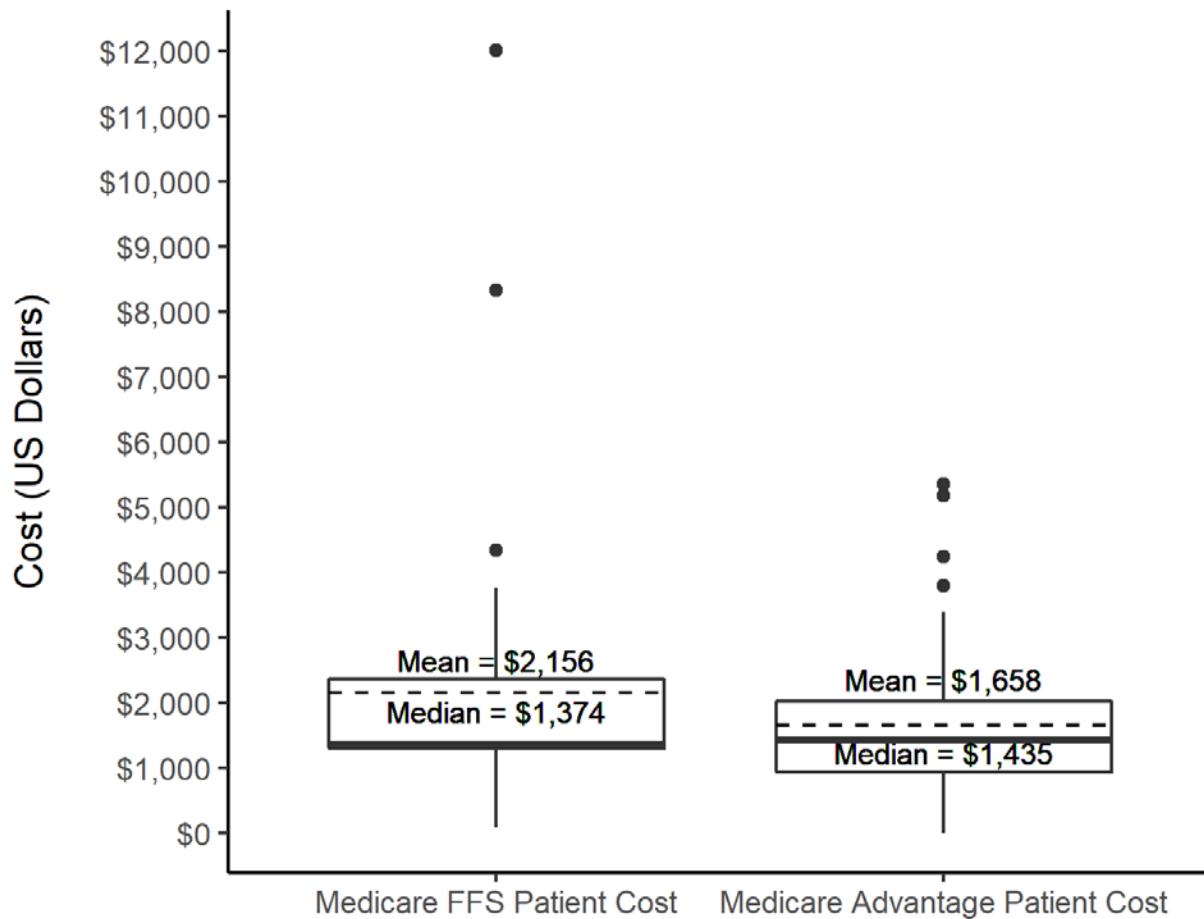

Figure S2. Patient Costs. Total patient costs per infection in the US Cohort with Major Infections for Medicare FFS and Medicare Advantage. Box-and-whisker plots represent distribution of data as follows: solid line = median; dashed line = mean; box = interquartile range; whiskers = minimum and maximum within 1.5 times interquartile range; dots = outliers (outside of 1.5 times interquartile range). All currency reflects 2017 US dollars. FFS = fee for service, SD = standard deviation, US = United States

List of WRAP-IT Investigators and Sites: listed by number of enrollments (most to least)

Site #	Site Name	Country	Investigator
1	The Lindner Research Center	US	Edward Schloss
2	Clearwater Cardiovascular & Interventional Consultants	US	Jose Gallastegui
3	Saint Thomas Research Institute, LLC	US	Robert Andrew (Drew) Pickett
4	Upper Michigan Cardiovascular Associates	US	Rudolph Evonich
5	IUCPQ - Institut Universitaire de Cardiologie et de Pneumologie	Canada	François Philippon
6	The Newcastle upon Tyne Hospitals	UK	Janet McComb
7	Cardiology Associates of Gainesville	US	Steven Roark
8	Iowa Heart Center, P.C. (West Des Moines)	US	Denise Sorrentino
9	Lourdes Cardiology Services Formerly (ACC)	US	Darius Sholevar
10	Cleveland Clinic	US	Khaldoun Tarakji
11	Hartford Hospital	US	Edmond Cronin
12	Chula Vista Cardiac Center	US	Brett Berman
13	AZ Arrhythmia Consultants	US	David Riggio
14	Policlinico Sant' Orsola - Malpighi	Italy	Mauro Biffi / Igor Diemberger
15	Baylor Research Institute (Plano TX)	US	Hafiza Khan
16	WakeMed Heart and Vascular WakeMed Health and Hospitals	US	Marc Silver
17	Oklahoma Heart Hospital	US	Jack Collier
18	MedStar Heart and Vascular Institute	US	Zayd Eldadah
19	Liverpool Heart and Chest Hospital	UK	David Justin Wright
20	Minneapolis Heart Institute	US	JoEllyn Moore
21	Mount Carmel East	US	Kamel Addo
22	Centennial Heart Cardiovascular Consultants	US	R. Chris Jones
23	University of Pennsylvania	US	Robert Schaller
24	Amarillo Heart Group	US	Joaquin Martinez-Arraras / Ismaile Abdalla
25	Prairie Education & Research Cooperative	US	Ziad Issa
26	Ottawa Heart Institute	Canada	Calum Redpath
27	Hamot Medical Center / Medicor Associates	US	Jean Moubarak
28	Institute Jantung Negara	Malaysia	Surinder Kaur Khelae
29	Rigshospitalet	Denmark	Berit Thornvig Philbert

30	Catharina Ziekenhuis	Netherlands	Timothy Alexander Simmers
31	St. Antonius Ziekenhuis	Netherlands	Lucas V.A. Boersma
32	University Hospital of Ioannina	Greece	Panagiotis Korantzopoulos
