

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: This excel document contains all primary raw data used for preparing the histogram with points in the main figures and supplementary figures, one sheet per quantification as specified

File Name: Supplementary Data 2

Description: This file contains all sequencing data of the CRISPR/Cas9 edited exon 1 of the *MAPT* gene encoding for the protein Tau for the amino acid sequences of the SH-SY5Y cell lines shown in Figure 1, as well as the plasmid maps and their nucleotide sequence of all shRNA plasmids (Tau and p53)
