

SUPPLEMENTARY TABLE 1

Singla M, et al. BMJ Open Gastro 2020;7:e000378. doi:10.1136/bmjgast-2020-000378

Diagnoses on 284 Chart Reviewed Cases with 2 ICD-9 codes for Crohn's disease (CD)	N (%)
Confirmed Crohn's disease (CD)	196 (69.0)
CD noted in records but missing pathology or endoscopic records for confirmation	9 (3.2)
Complications found in CD but no evidence to confirm CD	10 (3.5)
Recurrent anal fissures of fistulas with no mucosal disease	3
Mucosal thickening on computerized tomography (CT) scan	5
Intra-abdominal abscess	1
Cryptitis	1
Other chronic inflammatory bowel diseases	17 (6.0)
Radiographic ileitis without confirmation of endoscopic inflammation	4
Indeterminate colitis	4
Ulcerative colitis	3
Possible ulcerative colitis	1
Lymphocytic colitis	5
Other intestinal inflammatory conditions	7 (2.5)
Jejunal enteritis (without pathology to confirm CD)	1
Acute colitis followed by normal colonoscopy	2
Eosinophilic gastrointestinal disease	3
Behcet's disease	1
Other gastrointestinal diagnoses or conditions (not necessarily exclusive of the above)	24 (8.4)
Irritable bowel syndrome (IBS)	16
Carcinoid tumor	1
Appendicitis	1
Traveller's diarrhoea	1
Small bowel obstruction	1
Gastro-oesophageal reflux disorder	1
Dyspepsia	1
Chronic abdominal pain	1
Internal haemorrhoids with bleeding	1
Hidradenitis Suppurativa (increased in CD)	1 (.04)
No records of GI or immune-mediated diseases	20 (7.0)
