<sup>a</sup> Experiment displayed in Figure S4.

<sup>b</sup> Spirochetal burden determined by qPCR; shown are geometric mean ± geometric standard deviation from 10 mice.

<sup>c</sup> Spirochetal burden determined using *colE1* primers.

<sup>d</sup> Spirochetal burden determined using *recA* primers.

<sup>e</sup> Ratio of burden determined using *colE1* primers to burden determined using *recA* primers.

<sup>f</sup> NA, not applicable because the burdens obtained using either *recA* primers, *colE1* primers, or both were below the detection limit of 10 bacterial copies per 100ng DNA.
