3 **Supplementary Figure 1. Patterns of p53 staining in Barrett's oesophagus.**

4 a. Normal pattern of nuclear staining; b. Aberrant pattern with focal protein over-expression (arrow) in a
5 case with basal crypt low-grade dysplasia surrounded by normal background staining; c. Aberrant pattern
6 with focal loss of p53 staining (arrow) surrounded by normal background staining in a case with low-grade
7 dysplasia.
