

Control	62298	61600	60060	58239	56210
CKD	31149	30863	29986	28778	27238

Control	52412	51834	50495	48900	47216
DM	26206	25701	24671	23476	22187

Supplementary Fig. 2. Kaplan-Meier analysis of CRC incidence according to CKD or DM. Difference in the CRC incidence according to CKD (A) or DM (B) using the Kaplan-Meier method and log-rank test. The cumulative incidence of CRC was significantly increased in the CKD or DM group, compared with the control group ($p < 0.0001$). CRC, colorectal cancer; CKD, chronic kidney disease; DM, diabetes mellitus.
