

No Adaptation of the Prion Strain in a Heterozygous Case of Variant Creutzfeldt-Jakob Disease

Appendix

Appendix Figure. Western blot analyses of proteinase K resistant isoforms of PrP (PrP^{res}) show similar Type 2B like profiles in representative RIII mice inoculated with the 129MV case, a typical 129MM case and BSE. A typical 129MM vCJD standard and the 129MV isolate are shown for reference. Blots were probed with monoclonal antibody 6H4 (1:5000). Approximate molecular mass is shown in kDa.
