

Table S3. Percent of patients with QT interval predicted to be >500 ms stratified by baseline QTc

Regimen	Population	Baseline QTc (ms)	n in each group	% of patients with QTc >500ms*
400 mg BID 5 days	Baseline QTc of 394ms \pm 30SD	<400	569	0.2
		400-410	131	0.0
		411-420	94	1.0
		421-430	88	1.1
		431-440	53	9.4
		441-450	28	14
		>450	37	54
	Baseline QTc of 420 \pm 30SD	<400	239	0.0
		400-410	124	0.0
		411-420	142	1.4
		421-430	130	2.3
		431-440	119	2.5
		441-450	84	19
		>450	162	54
400 mg BID 7 days	Baseline QTc of 394ms \pm 30SD	<400	569	0.4
		400-410	131	0.8
		411-420	94	2.1
		421-430	88	6.8
		431-440	53	9.4
		441-450	28	28
		>450	37	73
	Baseline QTc of 420 \pm 30SD	<400	239	0.4
		400-410	124	2.4
		411-420	142	0.0
		421-430	120	5.4
		431-440	119	20
		441-450	84	31
		>450	162	76

Each virtual patient population had 1000 individuals

*% is calculated based on the number of patients in each baseline bin
